GENERAL MEETINGS

The Annual General Meeting of the SICAV takes place every year at the registered office of the SICAV, or at any other location in Luxembourg specified in the convening notice, within six months of the end of each financial year.

INFORMATION FOR SICAV SHAREHOLDERS

Copies of the audited annual reports and unaudited semi-annual reports are available at the registered office of State Street Bank International GmbH, Luxembourg Branch, 49, Avenue J.F. Kennedy, Luxembourg. Financial notices and daily Net Asset Value per share of the Sub-Funds of the SICAV are published in appropriate financial newspapers. Daily issue and redemption prices per share of the Sub-Funds of the SICAV are available at the registered and at the administrative offices of State Street Bank International GmbH, Luxembourg Branch. Financial notices are also published in the "Luxemburger Wort". The restated articles of incorporation were lodged at the offices of the "Registre de Commerce et des Sociétés" on 10 April 2017 where they are available for inspection and where copies thereof can be obtained upon request.

GLOBAL EXPOSURE AND EXPECTED LEVEL OF LEVERAGE (UNAUDITED)

The method used to calculate the global exposure is the commitment approach for all the Sub-Funds except for the following Sub-Fund for which the Management Company uses an absolute Value at Risk ("VaR") approach:

- Interfund BTPs 1-10 (effective from 13 December 2023, the Sub-Fund changed from absolute VaR to commitment approach)
- Interfund Equity Tactical Allocation (the Sub-Fund was launched on 5 December 2023)
- Interfund Bond Tactical Allocation (the Sub-Fund was launched on 5 December 2023)

and for the following Sub-Funds for which the Management Company uses a relative VaR approach:

- Interfund Bond US Plus
- Interfund Team Equity USA
- Interfund Global Convertibles
- Interfund Emerging Markets Local Currency Bond

Sub-Fund	Historical VaR (1m, 99%) 01/09/2023 - 31/08/2024			Leverage Sum of Notionals 01/09/2023 - 31/08/2024
	Min	Max	Average	Average¹
Interfund Bond US Plus	88,93%	118,27%	104,57%	131,38%
Interfund Team Equity USA	96,99%	104,17%	101,19%	51,08%
Interfund Global Convertibles	82,38%	108,78%	92,55%	102,78%

Interfund BTPs 1-10	1,59%	2,02%	1,77%	6,54%
Interfund Equity Tactical Allocation	0,10%	7,54%	1,55%	36,66%
Interfund Bond Tactical Allocation	0,09%	3,08%	1,34%	377,90%

¹Leverage calculated as sum of the notional of derivatives instruments.

REMUNERATION DISCLOSURE (UNAUDITED)**Foreword**

Fideuram Asset Management (Ireland) dac (the "Management Company") applies a remuneration policy and practices that are consistent with, and promote, sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profiles, applicable rules, the Prospectus or Articles of Incorporation nor impair compliance with the Management Company's obligation to act in the best interest of the SICAV.

Key figures

For the 2023 calendar year, the Management Company paid remunerations as follows:

DIRECTORS: 763 889 Euro

EMPLOYEES: 13 523 378 Euro

The average number of employees was 58; the detail of staff cost was:

Salaries, bonuses, benefits and secondments: 12 260 330 Euro

Social welfare costs/insurance: 1 345 975 Euro

Pension scheme costs: 680 962 Euro

Total Compensation: 14 287 267 Euro

Principles

The Management Company adopted remuneration policies and practices that:

- are consistent with and promote sound and effective risk management;
- do not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS funds it manages (hereinafter "the Managed Funds"); and
- are consistent with the business strategies, objectives, values and interests of the Company, the Managed Funds and the investors in those Managed Funds and include measures to avoid conflicts of interest.

The Management Company's remuneration and incentives policies are founded on the following principles:

- alignment of the conduct of management and employees with the interests of shareholders, clients and the related managed assets;
- merit, with a view to ensuring a clear correlation with the performance and managerial qualities shown;
- fairness, with a view to fostering honest conduct and standardizing remuneration packages;
- sustainability, in order to contain the costs arising from the application of the remuneration and incentives policies within a range of values that is compatible with medium and long-term strategies and annual objectives;
- proportionality based on the role held by staff members;
- compliance with the regulations in force.

The Management Company decided to entrust its Remuneration Committee with the advisory and consulting functions aimed to support the Board of Directors in all activities relating to remuneration, defined in accordance with the principles set out in the ESMA Guidelines on sound remuneration policies (ESMA 232/2013 and 411/2016). The Remuneration Committee has an advisory and consulting role aimed to support the Board of Directors in all the activities relating to remuneration.

The Remuneration Policy includes fixed and variable components of salaries and applies to all categories of staff, including senior management, risk takers, control functions and any employee whose professional activities have a material impact on the risk profiles of the Management Company and the Managed Funds.

The fixed component is defined based on contractual conditions, the position held, responsibilities assigned, and the specific experience and competencies gained by the employee.

The variable component is linked to personnel performance and proportional to the results achieved, keeping a prudential approach to risk, and is formed by:

- variable component, paid through the incentive and bonus systems;
- any stability agreements, non-compete agreements, retention allowance and similar.

The remuneration policy is subject to an annual central and independent internal review, to ensure that:

- the overall remuneration system operates as intended;
- the remuneration pay-outs are appropriate;
- the risk profile, long term objectives and goals of the Managed Funds are adequately reflected; and
- the policy reflects best practice guidelines and regulatory requirements.

The Group internal audit function conducts yearly missions on the rewarding and incentive system at the Management Company level. The audit conducted during the financial year 2023 revealed a positive picture, characterized by an appropriate implementation of the organizational model. Lastly, no irregularities have been detected in terms of individual compliance breaches among employees.

INTERFUND

MANAGEMENT'S REPORT

MACROECONOMIC SCENARIO

Global growth remained relatively buoyant during the financial year, with the slowdown in the US in early 2024 compared to the very high pace recorded in the second half of 2023 being at least partially offset by the acceleration in the Euro Area, where the stagnation phase that began at the end of 2022 ended, and in China (where, however, growth slowed again starting in the spring). In the first months of 2024, there was also a marked and unexpected reacceleration of inflation in the US, particularly core inflation (i.e. excluding energy and food), which interrupted the disinflation process that had been very clearly started in the second half of 2023. Price dynamics, on the other hand, were broadly in line with expectations in the case of the Eurozone, where the process of disinflation continued (although less evident in the case of services prices), while in China robust supply growth and weak demand were reflected in very subdued price dynamics. With conditions of slight deflation at the end of 2023 and the beginning of 2024. Upside surprises in US inflation at the beginning of 2024 led to a substantial reconsideration of monetary policy expectations by the markets: the unexpected turn in a decidedly accommodative direction by the Fed at its mid-December meeting had in fact led markets to price in numerous rate cuts during 2024, with a first cut expected as early as the March FOMC meeting. In the case of the ECB, the market had also gone so far as to price in a first cut at the March meeting or at the latest in the April meeting. Upside surprises in US inflation have led to a significant postponement in expectations regarding the timing of cuts: in mid-April, markets were pricing in a first Fed cut no earlier than September, with a marked reduction in the number of cuts expected by the market in 2024 (from seven at the beginning of the year to only one or two). After notable downside surprises in core inflation data in May and June and with some signs of an economic slowdown emerging (particularly with the July labor market data released in early August), the market stabilized in anticipation of a first rate cut by the Fed at its September meeting, and Chair Powell's Jackson Hole speech in late August further corroborated these expectations, indeed, it also pointed to the possibility of a 50 bps cut by the Fed. The ECB, after ending its hiking cycle in September 2023, instead proceeded to cut rates by 25 bps, widely expected by the market, at its meeting in early June, despite an upside surprise in inflation in May and an upward revision of its inflation forecasts for 2024 and 2025. The ECB then decided on a further hike, widely expected by the markets, at its September meeting. However, the ECB has maintained a very cautious stance regarding subsequent moves, confirming a very data dependent attitude. The period also saw the BoJ's turn in a less expansionary direction, which the markets had long expected: at its mid-March meeting, the Japanese central bank abandoned both negative rate policy and yield curve control, and the BOJ proceeded to raise rates further at the end of July, with a move only partially expected by the markets. Finally, the PBoC continued to pursue a cautiously expansionary policy, with a further rate cut in the summer of 2024, to support domestic demand weakened by the ongoing crisis in the real estate sector, which the authorities seem to have started to address more decisively from spring 2024 (although with results so far not evident). The dense global electoral calendar that characterizes 2024 (and which will culminate with the US presidential elections in November) has also recorded some surprises that were not welcome by the markets in emerging economies, but above all a return of political risk in the Euro Area with the surprise decision of French President Macron to call early elections after the outcome of the elections for the European Parliament which recorded significant progress by the far right. Political risks, which had been reflected in a sharp increase in the spread of OATs on Bunds, partially receded after the elections, which however confirmed a scenario of problematic governability in France.

After the strong acceleration in the second half of 2023, GDP growth **in the US** slowed significantly in the first half of 2024 (and in particular in the first quarter, when it fell below potential), but remained quite buoyant overall. Private consumption growth, which was weak at the beginning of the year, then accelerated again from the spring. The contribution to the growth of public spending has also decreased

compared to the second half of 2023. Labor market conditions remained quite robust overall in the first part of the period, thanks in part to the contribution of the sharp increase in immigration (including illegal immigration), but then deteriorated sharply in the early summer of 2024, when there was a marked slowdown (well below market expectations) in employment growth, particularly in July. The unemployment rate thus rose from 3.7% at the beginning of 2024 to 4.3% in July. In the second half of 2023, the acceleration in growth was associated with a significant reduction in inflation, particularly core inflation, but the disinflation process was interrupted at the beginning of 2024, with significant upward surprises in core price dynamics, especially in January and March, concentrated in particular in the sector of prices of services net of rents (the so-called super-core inflation). However, there were significant downside surprises in core inflation in May and June, and the market significantly reduced inflation risks. After the unexpected turn in a very accommodative direction at the December 2023 FOMC meeting, the Fed had to maintain a decidedly more cautious stance during the first months of the year, postponing the start of rate cuts that seemed imminent at the beginning of the year. Downside surprises in inflation in May and June and evidence of deteriorating labor market conditions have decisively shifted market expectations in the direction of a first rate cut at the Fed's September meeting.

In the Euro Area, economic activity remained very subdued in the final part of 2023, but in the first half of 2024 the economy emerged from the stagnation phase that began at the end of 2022, due to the energy crisis and the war in Ukraine. GDP growth in the first two quarters of 2024, just above 1% annualized, was in fact stronger than expected, with investment and exports recovering, while private consumption began to contribute to growth only more visibly from the second quarter. The improvement in cyclical conditions was also evident in the trend of business confidence indicators (in particular PMI indices), which recovered significantly during the half-year. The recovery mainly involved the services sector, while in the manufacturing sector conditions remained weak, with orders dismissed and production stagnating, even though the fall in energy prices helped the recovery of the most energy-intensive sectors and the impact of the transport crisis in the Suez Canal proved to be more modest than expected. In 2024, inflation continued its path back to the 2% target, but more gradually than in 2023, reaching 2.6% in July from 2.9% in December 2023. Only services inflation remained high, impacted by buoyant wage dynamics and a still very robust labor market. After raising rates for the last time in September 2023, the ECB, comforted by the gradual process of falling inflation and inflation expectations "anchored" to the 2% target, clearly indicated in early spring that it was ready to reduce monetary tightening from June onwards to support the still fragile recovery. The first rate cut (by 25 basis points) was decided in June and a second at the September meeting, but the ECB has not committed to the next moves, which will depend on the confirmation of the continuation of the decline in inflation. On the political front, uncertainty increased at the end of the period, due to developments following the European elections in early June in France, with President Macron's unexpected decision to dissolve the National Assembly after the success of the far right, which was then defeated in the parliamentary elections, with political instability that has nevertheless significantly increased. Finally, the EU Commission has increased tariffs on imports of electric cars from China and launched an excessive deficit procedure for some of the main economies of the Eurozone (including France and Italy), as part of the reform of the new Stability and Growth Pact.

In Asia, growth has remained rather moderate, with GDP performance **in China** fluctuating, but overall, not very robust. Growth in China has continued to be significantly affected by the impact of the crisis in the real estate sector, which the authorities have begun to address more vigorously since spring 2024, with the announcement of a public plan to purchase the large stock of unsold homes (but with little evidence regarding the actual implementation). The lively growth in production supply, also supported by the support of fiscal policy, on the one hand, and the weakness of domestic demand, on which the adjustment of the residential sector weighs, on the other, were reflected in a very modest dynamic of consumer prices during the period with brief phases of mild deflation. Economic policy, both fiscal and monetary, continued to support demand, with a rate cut in the summer of 2024. **In Japan**, the trend in economic activity remained rather subdued, mainly due to weak private consumption dynamics, but there was a significant recovery in the final part of the period. The evidence of accelerating wage growth convinced the Bank of Japan to proceed at its March meeting to remove negative rates and curve control.

In the following months, despite the prospect of further rate hikes, the yen continued to weaken, which then corrected violently since mid-June. At the end of July, the BoJ raised its key rates again, bringing them from 0.1% to 0.25%.

EQUITY MARKETS

Last year was very positive for equity markets. The S&P 500 index returned 26.88% including dividends in US Dollars, thanks to the outstanding performance of the technology sector. The Euro Stoxx 50 index returned 19.58% including dividends, whereas the Topix index had a total return of 18.11% in Japanese Yen. The performance was very positive also for the MSCI Emerging Market index, with a total return of 14.83% in USD.

The global economy was resilient while inflation continued to abate, despite some temporary upticks in US core inflation due to persisting imbalances in the services sector. Volatility episodes were limited and quickly reverted, contributing to a very constructive environment for risky assets. Although growth stocks generally outperformed value stocks, style rotations were frequent and often violent. The widespread use of short-dated options and algorithmic trading strategies had a clear role in exacerbating several episodes of volatility.

The astonishing progress in the field of artificial intelligence (AI), and its quick monetization, was the dominant theme of the year. The industry that benefitted most was that of semiconductors, with the MSCI USA Semiconductor and Semiconductor Equipment returning 80.64% in US dollars including dividends. Nvidia, a global leader in the design of Graphical Processing Units (GPU), a key hardware component for AI applications, had a total return performance of 146.15%, and became one the largest stock in the world with a total market capitalization greater than a trillion of US dollars.

FIXED INCOME MARKETS

At the start of the financial year in September, the ECB raised its key interest rates by 25 basis points, taking the deposit rate to 4.00% and the refinancing rate to 4.50%. The German 10-year yield reached a high of 2.97% in October, while Italian ten year peaked at 4.98%. Towards the end of 2023, markets became confident that inflation was coming under control and rates retreated. The ECB started cutting rates in June and look likely to adjust further in the coming quarters. The Bank of England also managed to lower rates during the year as rapid inflation cooled. The Federal Reserve kept rates on hold during the period, having raised the fed funds rate by more than five percentage points over the preceding 16 months. Similar to price movements in Europe, U.S 10-year rates peaked just under 5% in October before declining into year end. It is widely expected that the Federal Reserve will lower interest rates in the third quarter and beyond. The outlier again among developed market central banks was the Bank of Japan as they raised rates twice during the past twelve months. With hikes in March and July, they increased the key interest rate to around 0.25% from the previous negative 0.1%.

Fixed income markets believe that inflation is well under control and that central banks need to embark on an aggressive easing cycle, to prevent rates from being restrictive, and to support employment and economic activity. Weakening economic indicators in the EU suggest further rates action by the ECB. However, in the U.S, current economic data does not point to a recessionary outcome while the pace and magnitude of cuts priced by the Federal Reserve suggest otherwise. However, the evolution of inflation and employment data will be key to determine how far Central Banks can relax their monetary stance.

FOREIGN EXCHANGE MARKETS

The Euro remained in a tight range over the course of the financial year never closing above 1.1200 or below 1.0450. The Federal Reserve delivered no hikes during the period as inflation continued to tame and economic data remained robust. The ECB, however, delivered a 25 basis point cut in June believing rates had become restrictive. Despite the rate differential not favouring the single currency, the Euro managed to post a gain in excess of 2.5%.

Sterling remained in a tight range during the period. Like the ECB, the Bank of England pulled the trigger in 2024 and lowered rates by 25 basis points in August. Despite sticky high inflation, the U.K economy performed well and with political uncertainty removed after the general election resulted in a large majority for the Labor party, sterling performed well.

In March and July, Japan's central bank raised the cost of borrowing for only the second time in 17 years, increasing its key interest rate to around 0.25% from the previous negative 0.1%. These decisions were somewhat enacted to help alleviate the pressure on the Yen, which had experienced continued weakness during the financial year. From over 10% weaker in early July, the Yen was only just over 2% weaker against the Euro by financial year end.

The remainder of currencies in the developed market space endured low volatility years. Despite cutting rates twice, the Swedish Krona strengthened against the Euro whereas the Norwegian Krone lost ground, likely due to a weaker oil price. The other commodity currencies (Australian, New Zealand and Canadian dollar) were very stable versus the Euro.

On the emerging market front the performance was mixed. Through most of the period carry trades dominated the scene. Nonetheless, as the favorable interest differentials narrow, most EM Central banks are well into their easing cycles compared to DM, volatility is increasing. Currencies have been more susceptible to global and domestic shocks. In Central Europe, only the Polish Zloty managed to print a positive return during the period. Meanwhile the Turkish lira, the clear underperformer, continued to depreciate but at a much-contained pace. In Asia, higher yielding currencies like the Indian Rupee erased earlier gains, while lower yielding currencies like the Chinese Yuan and the Thai Bat gained momentum on the carry backdrop. In Latin America, the Mexican Peso and the Brazilian real were the underperformers with double digit losses. Since the presidential election in June, the Mexican Peso has wiped out all gains and is back to 2022 levels.

INTERFUND EURO CURRENCY

The Sub-Fund accrued performance steadily and consistently through the period on the back of a broadly supportive macro environment for short dated credit. 2yr German yield began the period close to the wide of the current cycle at 3% and traded in a range between c. 2.5-3%. This proved supportive for credit markets in particular for short dated bonds. In the first half of the period the Sub-Fund maintained a rate duration of 0. With the changing narrative on inflation and increasing probability of rate cuts the Sub-Fund took a rate position of 0.3 and in the closing quarter as the ECB introduced a 25bps cut, the German 2yr closed the period at c. 2.2%.

The Sub-Fund began the period with an allocation of 50% government, 45% corporate and 5%, which was broadly maintained for the first half of the period with spreads continuing to tighten, the Sub-Fund increased allocation to corporates to 50%, reduced government exposures to 40% and increased cash to 10%.

Spreads initially widened in September and into October with a significant escalation in tensions in the middle east. With all yields looking attractive on a multiyear look back, credit, particularly short dated credit saw an increased volume of inflows which drove demand and spread tightening. Throughout this period the Sub-Fund benefit from extending spread duration as bonds rolled down the curve and with reinvestment in the 3-4yr point. Volatility generated due to escalations of tensions in the middle east, French political uncertainty and changes in inflation/growth expectations did generate spread widening. However, given the elevated levels of demand for credit, and again particularly short duration credit, spreads rebounded quickly finishing the year c. 5bps from the tights in the 1-5yr section of the curve. Spread duration was in a range between 1.5-1.8 for the first 3 quarters of the period. The fund showed a preference for high quality senior financial issuers in both secondary and primary markets, which added additional spread carry to the Sub-Fund.

In the final quarter, with credit valuations trading at the tighter end of their historical range, the Sub-Fund has reduced spread duration to 1 with expectations of limited scope for further meaningful tightening in the short term. As such the Sub-Fund is positioned to continue to benefit from carry and roll down of its existing portfolio and is continuing to add short call/called tier 2 financials.

The Sub-Fund expects to retain its defensive positioning and retain high cash levels with valuations at current levels. Expected volatility due to geopolitics and the US election should provide volatility and opportunity to deploy capital at more attractive levels.

Performance of the Sub-Fund period was 3.98% and the main contributor to performance was curve roll down and carry, spread tightening particularly in financials and duration positioning.

The biggest detractor to performance was due to volatility caused by the French elections in June and an elevated bout of volatility in August which saw spreads sell off aggressively. The Sub-Fund also held small weighting in iTRAXX main index for the period, which also detracted from performance.

INTERFUND BOND GLOBAL HIGH YIELD.

The Sub-Fund posted positive returns but underperformed the index (on a gross basis) during the period, primarily due to credit strategy. However, these losses were partly offset by the positioning in higher yielding sectors. Despite strong positive absolute total returns, the tactical underweight stance in the light of recessionary conditions hindered relative gains as credit spreads tightened over the period. On rating front, the underweight stance in CCC & below was the major detractor but position in other rating brackets added value.

Detractors: The positioning in energy, capital goods and consumer goods sectors were the key detractors from returns from a relative basis. The overweight allocation to Petrofac Inc and Ardagh Group were the notable detractors. Bond prices of Petrofac fell after it reported that it was in discussions regarding

a major debt restructuring. Sentiment further dampened after the company notified investors that it will not be able to make a vital bond payment. Likewise, its shares were also suspended for trading as financial pressure mounted. Ardagh Group's bond price dropped as Standard & Poor's (S&P) downgraded its ratings to 'CCC-' from 'B-' amid looming distressed exchange. The move came after the announcement that Ardagh has entered into a new loan deal with Apollo Global Management. The funds will be used to repay its upcoming notes; the deal allows Apollo to swap unsecured and payment-in-kind notes for senior loans. The exposure to iHeartcommunications also weighed on gains. Investor sentiment towards iHeartCommunications turned negative after creditors hired financial and legal advisers following a significant revenue decline in its first quarter 2024 results. The fall in revenues was largely due to dwindling demand for radio advertisement and an adverse industry environment, which led the company's debt to trade at a distressed level.

Contributors: The overweight stance in European banks was the primary contributor as these banks have made significant progress in strengthening their financial position through cautious operations.

In that respect, the position in Spanish bank Cajamar Caja Rural added value. In its financial year 2023 and first quarter of 2024 financial results, the bank reported that it has successfully cleaned up its legacy assets and has improved its capital base. Bond prices experience a rise as the investors are optimistic about the fundamentals of the banks.

At a single name level, the favourable stance in real estate name CPI Property Group boosted returns. The company posted robust operating performance in its financial year 2023 and first and second quarter of 2024. Additionally, Investor sentiment towards CPI Property Group was supported as it announced that it would liquidate a 49% equity interest in Vulcanion for €200 million to Sona Asset Management in a bid to reduce leverage.

Sub-Fund positioning: Credit Sector Strategy: Sector weights are a consequence of bottom-up security selection decisions, which are driven by long-term credit fundamentals and current valuations. The Sub-Fund has an underweight stance in consumer non-cyclicals, consumer cyclicals and quasi/sovereign sectors, while maintaining an overweight exposure to banks & financials and communications as of August 2024.

Duration position/yield curve strategy: High yield bonds naturally exhibit low duration. Duration does not play a big role in the alpha generation of this product. We tend to match it to that of the benchmark. **Planned risk management actions:** Due to the asymmetric nature of investing in high yield bonds, it is not enough to outperform in strong up markets; protecting against the downside is imperative. As a result, our philosophy when it comes to managing high yield bonds can be summarised as conservative, yet flexible, focussing on diversification, liquidity and downside protection. Our bottom-up approach to security selection and portfolio construction is at the heart of this strategy. We believe proprietary fundamental research, involving both equity and credit analysis, combined with strict risk controls will generate strong risk-adjusted returns over a full market cycle.

The last one year has been very challenging due to the hawkish stance of central banks, persistent inflation and recessionary fears. We believe that the alpha creation story is likely to be found in single name/sector selections. The energy sector remains in focus but saw a continued reduction in absolute and relative market weight as the fundamental strength is being increasingly priced in, and deleveraging continues to moderate. The Sub-Fund increased its exposure to the financial sector as they are well capitalized and offer good valuation premium vs corporates. Over the period, the largest increases in absolute and relative level were in communication and consumer non cyclicals. By rating bucket, the Sub-Fund remained underweight in BB-rated bonds mainly due to stretched valuations. The Sub-Fund continues to maintain the underweight stance in CCC & below with credit selection and positioning within capital structure remaining key focus. The period ended with 4.9% allocation to cash.

Outlook: Global high yield spreads remained range bound amid expectation that the economy will remain on a good path while credit fundamentals and supply/demand dynamics continue to be positive.

We are getting more selective in the primary market and find there is less opportunity to generate alpha in this market dynamic.

Global high yield spreads remained range bound amid expectation that the economy will remain on a good path while credit fundamentals and supply/demand dynamics continue to be positive. We are getting more selective in the primary market and find that there is less opportunity to generate alpha in this market dynamic. That being said, we are maintaining an underweight position in the Global High Yield space, with a credit beta at the 0.97 level in August. Over the period, the average credit beta has remained at 1.0, and our average allocation to cash at 2.9%.

INTERFUND EURO BOND MEDIUM TERM

During the past twelve months, the Sub-Fund has been invested in a wide variety of EU sovereign bond markets. At various times throughout the year, duration positions were taken across these markets. Tactical FX and Fixed Income future and option positions were also undertaken.

EU sovereign yields have declined over the past 12 months with considerable volatility over the period. A Monetary policy easing cycle has commenced in Europe although persistent domestic and services inflation has meant the pace of easing has been measured. The Sub-Fund performance, like all long duration funds, was initially hindered by high policy rates. Performance turned positive, improving on the prior year as rate cut expectations built, and policy easing was delivered, but slightly lagged its reference benchmark. The evolution of Inflation and Employment data will be examined closely to determine the length and depth of the current easing cycle. While markets expect a steep cutting cycle in the year ahead, any additional deterioration in economic performance will provide opportunity to add overweight duration.

INTERFUND EURO BOND SHORT TERM 1-3

During the past twelve months, the Sub-Fund has been invested in a wide variety of EU sovereign bond markets. At various times throughout the year, duration positions were taken across these markets. Tactical FX and Fixed Income future and option positions were also undertaken.

EU sovereign yields have declined over the past 12 months with considerable volatility over the period. A Monetary policy easing cycle has commenced in Europe although persistent domestic and services inflation has meant the pace of easing has been measured.

The Sub-Fund performance, like all long duration funds, was initially hindered by high policy rates. Performance turned positive, improving on the prior year as rate cut expectations built, and policy easing was delivered, but slightly lagged its reference benchmark.

The evolution of Inflation and Employment data will be examined closely to determine the length and depth of the current easing cycle. While markets expect a steep cutting cycle in the year ahead, any additional deterioration in economic performance will provide opportunity to add overweight duration.

INTERFUND EURO BOND LONG TERM

During the past twelve months, the Sub-Fund has been invested in a wide variety of EU sovereign bond markets. At various times throughout the year, duration positions were taken across these markets. Tactical FX and Fixed Income future and option positions were also undertaken.

EU sovereign yields have declined modestly over the past 12 months with considerable volatility over the period. A Monetary policy easing cycle has commenced in Europe although persistent domestic and services inflation has meant the pace of easing has been measured.

The Sub-Fund performance, like all long duration funds, was initially hindered by high policy rates. Performance turned positive, improving on the prior year as rate cut expectations built, and policy easing was delivered, but it underperformed its benchmark.

The evolution of Inflation and Employment data will be examined closely to determine the length and depth of the current easing cycle. While markets expect a steep cutting cycle in the year ahead, any additional deterioration in economic performance will provide opportunity to add overweight duration.

INTERFUND BOND US PLUS

Over the 12-month period as of 31 August 2024 the Sub-Fund returned a positive performance of around 4.5% net of fees, slightly underperforming its benchmark (-0.89% for the hedged Share Class).

Contributors: Tactical curve positioning in the U.S., mainly via an overweight to the belly and the long-term of the curve, as yields broadly decreased. By contrast, the slightly underweight to the shorter maturities (1 year and 2 year) and to the very long maturities as 30 years and 50 years marginally detracted from the overall performance. Exposure to eurozone and dollar block duration, as yields fell. Security selection within the Investment Grade Financial and Industrial sector, as spreads generally tightened over the period. Positions within securitized credit, mainly via European RMBS and high quality CLOs, as spreads generally tightened over the period. Tactical position to Emerging Markets Debt, mainly to South Africa, Singapore and Mexico, as spreads generally tightened over the period. Long exposure to the Turkish lira due to the cash rate differential vs. the U.S. dollar.

Detractors: Tactical exposure to Brazilian duration in the second quarter of 2024, as Brazilian local yields increased modestly on the back of the central bank of Brazil signaling that they are close to the end of their easing cycle. Despite the narrowing of spreads, the overweight position in certain Agency MBS has detracted from the overall performance during the period.

Positioning: The YTM of the portfolio is ~5.39% (96 bps yield advantage versus the benchmark) based on our diverse portfolio construction. This should be a tailwind going forward even if nothing changes, with key alpha themes offering price appreciation potential. Elevated market volatility is likely to offer compelling alpha opportunities ahead, making active selection critical (and attractive).

Duration: The Sub-Fund maintained its underweight to headline duration and increased its underweight to U.S. duration, primarily at the intermediate section of the curve. The Sub-Fund reduced short exposure to duration in Japan, taking profits. The Sub-Fund maintains a long exposure to TIPS as a hedge against the possibility of inflation being higher than currently priced in the market.

Spread: The Sub-Fund is opportunistic in corporate credit: Maintaining an underweight position and actively seeking compelling name and sector exposure. The Sub-Fund holds high quality EM external debt of sovereign and quasi-sovereign issuers. The Sub-Fund continues to favour Agency MBS, as they are AAA-rated assets that offer relatively attractive spread, high levels of resiliency and good liquidity, as well as senior positions in securitized credit. In the Agency MBS space, we favour higher coupons that we think are less likely to be impacted by the Fed's balance sheet unwind.

Currency: Currency positions continue to be modest. The Sub-Fund remains tactical, and is long a basket of EM currencies (South Africa, Turkey, India and Indonesia).

INTERFUND BOND JAPAN

The Sub-Fund recorded a negative performance both in absolute and also in relative terms.

During the past twelve months, the Sub-Fund has been invested in all areas of the JGB curve out to 2060. At various times throughout the year, a preference to be short duration was expressed with a particular concentration at the front end of the curve. Tactical FX positions were also undertaken.

The JGB market performed sluggishly during the period. Bank of Japan as they raised rates twice during the past twelve months. With hikes in March and July, they increased the key interest rate to around 0.25% from the previous negative 0.1%. Despite recovering from very depressed levels (due to the large interest rate differential) the Yen suffered against the majority of developed market currencies throughout the year.

The Sub-Fund performance was hindered by rising Japanese rates. While other regions reached the peak of the inflation move during the financial year, CPI in Japan experienced a rebound after the end of 2023. Additionally, performance was inhibited by the weakening of the currency.

Further rate hikes by the Bank of Japan seem entirely possible. While such action may hurt the duration element of the Sub-Fund, a positive effect on the currency could offset or outweigh such negatives.

INTERFUND EQUITY ITALY

Over the 12-month period as of 31 August 2024 the Sub-Fund returned a positive performance of around +21.1%, and it overperformed its benchmark.

Last year (September 2023-August 2024) was marked by a very positive momentum for the Italian equity market: there was a stable market in September and October in a context of weak company results, then a big rally till March, followed by a trading range until the end of August. In all this period the Sub-Fund had only limited attempts at correction. The largest one was in August but shortly recovered. In this case the movement was attributed to global movement on yen carry trade. The main topic of the year was mainly macroeconomic and connected to the slowdown in inflation and the expectation of interest rate cut in USA and in Europe, in a subdued economic environment but not a recessionary one.

The Sub-Fund experienced a good performance during the period and it outperformed its benchmark: the asset allocation was changed slightly, in connection to the trend in the market, but overall the Sub-Fund maintained an overweight in equity exposure relative to the benchmark. The sector allocation was modified several times, but overall, there was an overweight on financials and in energy and an underweight in utilities and in consumer discretionary and, in particular, on luxury segment; the outperformance was a result of both positive stock selection and asset allocation contribution.

Expectations for the future are moderately positive and connected to the interest rate cut both in Europe and in USA. The flow of money relative to the PNRR will continue to sustain the Italian market. However, the economic slowdown, the geopolitical situation, the next election in USA, and the potential week number from the company could sometimes determine some period of increased volatility.

INTERFUND EURO CORPORATE BOND

The Sub-Fund started this period defensively positioned versus its benchmark as concerns around sticky inflation took hold triggering a sell-off in rates which saw the German 5-year touch multi year highs. This coupled with the expectation of heavy supply saw spreads widen materially in September and through October. The Sub-Fund used this period of weakness to increase exposure significantly across high quality non-financials which had been trading well-defined ranges prior to this weakness. Positive comments from the Fed in late November that we had reached peak inflation sparked a significant rally in spreads which would last from late October right through to early April, breaking through the floor of these previously mentioned ranges. These moves were also driven by significant inflows into credit as an asset class with all-in yields looking extremely attractive on a multi-year horizon and equity valuations looking suspect to correction. During this period the Sub-Fund gradually increased its long exposure further through a combination of financials and lower quality non-financials with compression emerging as a key theme. The Sub-Fund also began setting shorts in low-beta non-Financials with such high-quality names struggling to break through the 2021 tights.

Geopolitics took centre stage in April after escalations in the Middle East conflict between Iran and Israel rocked markets and sparked a risk-off move in credit. The Sub-Fund promptly cut risk and returned to flat as we awaited further developments on the geopolitical front. The next couple of months would prove quite choppy for credit with spreads rebounding, before coming under pressure again in June over fears around a right-wing Le Pen lead government in France following the calling of a snap election in France. Once again, spreads recovered in strong fashion before recessionary fears and the reported large-scale unwinding of the Yen carry trade in August caused turmoil across global markets. This time spreads failed to recover with the overhang of supply in September deterring investors despite strong performance in other asset classes. During this period the Sub-Fund remained nimble, keeping overall risk levels light due to challenging liquidity conditions while focusing on relative value trades given the large dispersion following the moves.

Performance for the year was a total return of 7.07% / -0.21% vs the benchmark. Positive contributors to Sub-Fund performance came from long positioning relative to the benchmark from October through to April. Other positive contributions came from the addition of high-beta corporate paper, while increasing exposure to T2 and AT1 with beta compression key during this period. Finally, the Sub-Fund also went overweight French risk following the conclusion of the French election which was deemed favourable by markets.

The largest detractor to performance was conservative positioning in financials which outperformed non-financials significantly during this period and following the Credit Suisse turmoil last year. Underweights in high beta real estate names were also a drag as this sector was the biggest outperformer over the past 12 months. Idiosyncratic risk was also a common theme over the past 12 months with the performance impacted by stories involving Thames, Tennet, and Eurofins.

Currently, the Sub-Fund is positioned with neutral risk relative to its benchmark. Credit has underperformed other asset classes in August due to the overhang of bond supply, and all-in yields have lost some appeal following the recent rally in Euro rates, which saw the German 5-year yield fall below 2%. As a result of this underperformance, the cash-CDS basis is now at its most negative level year-to-date. The strategy moving forward is to add high-quality names as supply tapers off and hedge these positions using CDS. This approach allows the Sub-Fund to keep overall risk light while preparing for expected volatility during the seasonally weak October period and the upcoming U.S. elections in November.

INTERFUND TEAM EQUITY USA

The Sub-Fund generated an overall net absolute positive performance and the unhedged share class overperformed its benchmark over the 12-month period.

Management of the Sub-Fund is sub-delegated to four separate managers, T. Rowe Price, Man, Wellington and Goldman Sachs.

Three of the four managers outperformed during the period, with Wellington being the only detractor. The allocation across the four managers was adjusted earlier in 2024 to increase the exposure to Wellington and reduce the exposure to mega caps. At the end of August 2024, T. Rowe Price accounted for 30% of the Sub-Fund, Wellington for 29%, Goldman Sachs for 21% and Man for 20%.

Man: The Sub-Fund outperformed the benchmark by 2% for the twelve months ending 31 August 2024. Equity markets moved higher in the period as inflation rates continued to normalise with economic growth remaining solid. After increasing interest rates eleven times between March 2022 and July 2023, the Fed remained on hold for the period. Despite the tighter monetary conditions, the US economy has held up well and the Fed is now embarking on an easing cycle which increases the likelihood of a soft landing. The largest contributor to the Sub-Fund performance in the period was Fair Isaac, which provides credit ratings for consumers. The company continues to take significant pricing in their mortgage product but still has a long way to go. The current cost of a FICO score is \$3.50 which

compares to a \$6,000 cost of closing a mortgage in the US. The Sub-Fund was also helped by the long position in CRH PLC, the aggregates provider. The stock was strong after they moved their primary listing to the US which highlighted the valuation gap to US listed competitors such as Martin Marietta and Vulcan Materials. Other notable performers included PetIQ, the provider of pet medication and supplements, which was bought out by private equity and XPO logistics where new management has significantly improved their operating performance. The Sub-Fund's underweight position in Meta Platforms was the largest detractor to performance for the period. Up until January 2024, the Sub-Fund did not own a position in the company for ESG reasons with the stock rated CCC by MSCI. However, the position was neutralised as soon as the company was upgraded by MSCI. The Sub-Fund was also impacted by overweight positions in airlines including Allegiant, American Airlines and Delta. Given the operational woes at Boeing and supply chain constraints at Airbus, the supply picture has continued to improve. However, domestic capacity did accelerate in the second quarter putting pressure on airline pricing. This has since reversed with capacity expected to be up just 2% from September until the end of 2024 and pricing has inflected positively. Importantly, the low-cost airlines are structurally challenged and are having to rationalize capacity in order to stop losing money. This should provide a strong environment for premium carriers that we still holding in the Sub-Fund such as Delta and Alaska. With the Fed now cutting rates, a soft landing does seem achievable in the US. The Sub-Fund has been increasing exposure to more cyclical sectors of the market such as Industrials and Consumer Discretionary. At the same time, the Sub-Fund has lowered exposure to more defensive sectors and is now underweight Consumer Staples. With the move lower in bond yields, the Sub-Fund has added exposure to housing related areas of the market which should benefit from mortgage rates reaching their lowest levels since the start of 2023. Whilst the Sub-Fund does retain exposure to airlines, this has been diversified with the addition of aircraft leasing companies that benefit from the challenges at both the aircraft manufacturers and the engine OEMs.

Goldman Sachs: Among investment themes, signals within the Sentiment Analysis pillar contributed most positively to relative returns followed by the suite of signals within High-Quality Business Models, Fundamental Mispricings, and Themes and Trends. Within Sentiment Analysis, analyst & management sentiment factors performed well. These factors use natural language processing and machine learning techniques to synthesize sell-side reports and earnings call transcripts to gauge analyst and management sentiment. Meanwhile, signals gauging management quality within the High-Quality Business Models pillar helped relative performance. Additionally, within Fundamental Mispricings, factors evaluating industry rotation added to the relative returns of the portfolio. Finally, economic linkages related signals helped the performance of the Themes and Trends pillar.

Among sectors, holdings within the Health Care sector contributed the most to relative performance, with an underweight position within the Health Care Providers & Services industry contributing particularly strongly. On the downside, holdings within the Real Estate sector detracted the most from excess returns, where an overweight position within the Industrial REITs industry hurt relative performance.

At an individual stock level, an overweight position in Dell Technologies Inc, held primarily due to views around High-Quality Business Models related factors, performed well. Conversely, an underweight position in NVIDIA Corp, held primarily due to views on High-Quality Business Models related factors did not do well.

Looking ahead, the Portfolio Management (PM) team continues to believe that cheaper stocks should outpace more expensive ones and good momentum stocks should do better than poor momentum stocks. The PM team also prefers names about which fundamental research analysts are becoming more positive and companies that are profitable, have sustainable earnings and use their capital to enhance shareholder value. As such, The PM anticipates remaining fully invested and expect that the value he may add over time will be due to stock selection, as opposed to size allocations. It is believed that maintaining the conviction in the well-researched signals while always evaluating the investment process from a risk management perspective has worked well. The PM continues to retain strong conviction in the

investment process, the ability to think objectively about risk management and the talent and commitment of the people as it weathers this trying time.

The team is committed to being always accessible to the clients, particularly in periods of more extreme market events. Should it be of interest, the Goldman Sachs Asset Management relationship manager can facilitate a call with the PM team to further discuss the latest market environment, attribution of the investment strategies, and the investment process in general. The PM team remains grateful for the trust that clients have placed in him and looks forward to the continued partnership with them.

Wellington: The Sub-Fund underperformed its benchmark, the MSCI United States Index by 88 bps (gross-of-fees) for the one-year period ended 30 August 2024 but delivered positive absolute returns. Stock selection within the information technology, consumer staples, and financials sectors detracted the most from relative performance. This was partially offset by stronger selection within the consumer discretionary and health care sectors.

Top detractors from relative performance during the period included underweight positions in NVIDIA (information technology) and Meta Platforms (communication services), and not owning a position in Broadcom (information technology). Conversely, top contributors to relative performance included underweight position in Tesla (consumer discretionary), and overweight positions in Spotify (communication services) and Uber (industrials).

At the end of the period, the Sub-Fund was modestly overweight to the health care, financials, and communication services sectors, while modestly underweight to energy, information technology, and industrials sectors.

The Sub-Fund is managed by a team of Global Industry Analysts (GIAs) who hold differentiated outlooks across sectors. Though there are areas of market optimism, the broader economy remains volatile with geopolitical tensions, an uneven global growth recovery, grinding progress toward disinflation, and tight financing conditions. The health of the consumer continues to be a topical debate among our GIAs, leading to a reassessment of growth and valuation expectations. The technology sector is also rapidly evolving with the rise of Generative AI, bringing potential implications beyond what is appreciated in today's markets. The continued growth in power demand and progress in the energy transition impacts a variety of business models across sectors. As our GIAs monitor these dynamics, they seek to identify opportunities and implications for investors navigating the uncertain market environment.

T. Rowe Price: The Sub-Fund produced gains and outperformed the benchmark for the one-year period ended 31 August 2024. The information technology sector was the largest contributor to relative performance due to stock selection. Overweight positions in NVIDIA, Apple, and Microsoft helped relative results. Within the health care sector, security selection aided relative gains. Overweight positions in Eli Lilly and Intuitive Surgical and a non-index position in Tenet Healthcare added value.

Stock selection in the communication services sector was also beneficial. Overweight positions in T-Mobile US, Meta Platforms, and Netflix contributed to relative results. Conversely, the utilities sector detracted from relative performance due to stock selection. An underweight position in Duke Energy and not owning Vistra hurt relative results.

Outlook: The portfolio manager believes the US Structured Research Equity Strategy can help cushion against market uncertainty as it has done in the past, outperforming in a variety of market environments. Some of the participating analysts cover sectors that are more growth oriented, while others focus on those that are more value oriented. The diversifying effect of the contributing analysts, along with applying rules-based construction principles, leads the portfolio to be broadly sector- industry-, and style-neutral. By tightly controlling risk relative to the benchmark and isolating stock selection skill, the portfolio manager believes the strategy provides the potential for outperformance in all market environments.

INTERFUND GLOBAL CONVERTIBLES

Over the period the Sub-Fund advanced 4.78% (net) while the benchmark rose 5.30%. Market attribution was the main positive contributor over the period while stock selection, region and sector attribution detracted.

At the end of the reporting period, on an EDNV basis, the three largest overweights were Live Nation Entertainment, Duke Energy Corporation and Exact Sciences. Conversely, the three largest underweights were PG&E Corporation, Evergy and Fluor. On a regional and sector basis, the largest contribution came from positioning and stock selection in US Communications and Consumer Non-Cyclicals. Conversely, positioning and stock selection in US Industrials and US Technology weighed on returns. On a single name basis, the top three contributors were Microstrategy, Cellnex and Saipem. Conversely, the top three single name detractors to performance were Safran, Wolfspeed and Ivanhoe Mines.

The Sub-Funds underperformance was predominantly driven by stock selection, though regional attribution and sector attribution were also negative.

Outlook: We believe that outright convertibles remain the most asymmetric part of the credit market today with the mix of yield and conversion premia as attractive as it has been in many years. Investors can simultaneously receive a decent level of income while retaining upside exposure to SMID-cap stocks that have historically performed well during rate cutting cycles and are also trading at historically attractive relative valuations versus the mega-cap equities which have driven headline equity index returns. Further, the recent equity sell-off in early August demonstrated that convertibles are well placed to protect capital to the downside. In the primary market YTD issuance reached \$72.8bn through the end of August, well ahead of 2023 levels. Issuers have trended towards larger and higher quality companies with almost 40% of volumes coming from crossover issuers (replacing straight debt with convertible debt) looking to trim interest expenses amid the higher-for-longer rates environment.

INTERFUND EQUITY JAPAN

During the reference period, the performance of the Sub-Fund Fonditalia Japan was +16.06% (Share Class A), while that of its benchmark (MSCI Japan) was equal to +15.19%.

The net relative performance of 0.87% was supported by stock selection in Information Technology, with standout performance from Disco Corp.

Outlook: During the reference period, the investment process of the Sub-Fund was improved, especially for what concerns the portfolio construction. The Sub-Fund's management team adopts a quality-growth approach that should be source of positive excess returns over the medium-long term. The strategy is supposed to work in efficient markets such as the Japanese blue-chip segment.

Additional layers of discretionary choices are based on a mix of quantitative and qualitative analysis, aimed at exploiting temporary market inefficiencies.

INTERFUND EQUITY EUROPE

During the reference period, the performance of the Sub-Fund Interfund Equity Europe was +15.86% (Share Class A), while that of its benchmark (MSCI Pan Euro) was equal to +14.84%. During the year, the composition of the benchmark changed, from 100% MSCI Pan Euro to 100% MSCI Europe.

The relative performance of 1.02% can be attributed to stock selection in the Healthcare sector, where Laboratorios Farmaceuticos Rovi Sa provided significant gains. Positive contributions came also from

stock selection in Communication Services, notably Auto Trader Group Plc, and an overweight in Consumer Discretionary, led by Ferrari Nv.

Outlook: During the reference period, the investment process of the Sub-Fund was improved, especially for what concerns the portfolio construction. The Sub-Fund's management team adopts a quality-growth approach that should be source of positive excess returns over the medium-long term. The strategy is supposed to work in efficient markets such as the Europe blue chip segment.

Additional layers of discretionary choices are based on a mix of quantitative and qualitative analysis, aimed at exploiting temporary market inefficiencies.

INTERFUND EQUITY PACIFIC EX JAPAN

MSCI Pacific ex Japan (developed countries) had a significantly positive performance in EUR terms. The best performing market were Australia, Singapore and New Zealand, while Hong Kong, was the only one with a negative return. On a sector basis New Zealand Healthcare, Singapore Communication Services, Australia IT were the best performers while Hong Kong Consumer Discretionary, Hong Kong Financials, Hong Kong Real Estate were the laggards.

The Asia Pacific ex Japan Markets were mainly driven by global risk appetite. Among the major global drivers, the most relevant were US tech rally led by AI (Artificial Intelligence) thematic along with expectations of a more dovish FED stance due to some weakness in the US economy. Regionally instead China was the major factor affecting Hong Kong sentiment and performance due to mainland economic crisis and lack of significant fiscal and monetary support.

From a portfolio perspective, the aim was to exploit market inefficiencies through a blended, style-agnostic investment approach. This combined the focus on bottom-up fundamentals, with a macro and quantitative support. A robust risk management framework was a constituent part of the investment process and put a lot of emphasis on diversification.

In terms of market exposure, the Sub-Fund managed it dynamically. An under-investment exposure (between 98.5%-99%) was run for most of the financial year to balance portfolio beta. In terms of markets allocation, the Sub-Fund, ran an overweight on Australia and China Tech Offshore while it kept Singapore and Hong Kong as major underweights for most of the period considered. Starting from June the Hong Kong underweight was firstly reduced and then turned into an overweight through a significant exposure to the domestic Real Estate sector. Australia IT was a structural overweight for most of the financial year through exposure to corporate and logistic software companies. Australia Healthcare exposure was another structural overweight through an oncology and a dermatology small cap player. The overweight on the Real Estate asset class was another long term exposure and it was partly driven by Australia idiosyncratic risk and during summer mainly due to Hong Kong Reits considering their sensitivity to lower interest rates. Significant underweight were run on Australian Banks and Australian Consumer Staples. The Sub-Fund plans to further increase exposure on Hong Kong in a global macro slowdown scenario, where local Real Estate valuations would benefit from lower interest rates. Australian Banks represent at the moment one of the most expensive asset class in the region and the Sub-Fund would increase its underweight benefiting Miners if a China stimulus occurs.

The Sub-Fund total-return performance was significantly positive.

The Sub-Fund relative performance vs the Benchmark was significantly positive due to the stock picking, markets and sector positioning described above.

INTERFUND MILLENNIALS EQUITY USA (previously INTERFUND EQUITY USA ADVANTAGE)

Morgan Stanley: The broad market advanced during the period ended 16 June 2024 as measured by MSCI USA Growth Price Index. Information Technology and Communication Services posted the highest return in the index. Most sectors advanced over the period, however, Energy and Real Estate posted negative returns, were the relative laggards in the index.

Fear and uncertainty due to concerns around inflation, the related timing/pace of potential interest rate cuts, and ongoing geopolitical tensions contributed to greater market volatility and weaker sentiment towards high growth equities as a select few mega cap companies drove market results over the period ended 16 June 2024. As 2023 wrapped up, easing concerns around interest rate hikes and the prospect of potential near-term interest rate cuts boosted sentiment and performance for high growth equities. However, rising interest rate expectations in early 2024, particularly in April and May, sharply reversed this trend, creating a headwind for the portfolio over the period. The Sub-Fund continued to focus on stock selection and the long-term outlook for companies owned in the Sub-Fund. The Sub-Fund's turnover during the period, at 36%, was in line with historical levels. Holdings that were eliminated during the period include Intuitive Surgical, Datadog, and Chewy. These positions were eliminated in favor of investments that the Sub-Fund believes offer a superior risk/reward profile including CrowdStrike, MicroStrategy, and American Tower Corp. Over the period under review the Sub-Fund's sector positioning was as follows:

- Average sector overweight in Consumer Discretionary, Industrials, and Real Estate
- Average sector underweight in Information Technology, Health Care, Consumer Staples, Energy, Materials, Financials, Communication Services, and Utilities

For the period, the Sub-Fund underperformed its benchmark due primarily to unfavourable stock selection. Information Technology was the top detractor in the portfolio, due to unfavourable stock selection and an average underweight position in the sector. Majority of sectors detracted over the period; however, Industrials was the top contributor due to favourable stock selection. Positions in Microsoft, Meta Platforms and Bill were among the greatest detractors, while the top contributing holdings included Uber Technologies, MicroStrategy and DoorDash. Microsoft and Meta Platforms were detractors due to an average underweight position in each company.

Outlook: The investment team believes having a market outlook can be an anchor. The team's focus remains on assessing company prospects over a five-year horizon, and owning a portfolio of unique companies that have strong, sustainable competitive advantages and whose market value can increase significantly for underlying fundamental reasons.

Fideuram's comment: During the reference period, the performance of the Sub-Fund Interfund Equity USA Advantage was +15.54%, while that of its benchmark was equal to +31.17%.

The underperformance was concentrated between September 2023 and beginning of June 2024. Until the second half of June 2024, the Sub-Fund was managed by Morgan Stanley Investment Management, under the name of Interfund USA Equity Advantage.

A change of delegated manager occurred on June 17th, 2024, with Fideuram Asset Management Ireland dac becoming the new investment manager of the Sub-Fund. Since then, the relative performance has been flat.

Outlook: During the last two months of the reference period, the Sub-Fund's investment process was revised in full. The Sub-Fund's management team adopts a quality-growth approach that should be source of positive excess returns over the medium-long term. The strategy is supposed to work in efficient markets such as the Japanese blue-chip segment.

Additional layers of discretionary choices are based on a mix of quantitative and qualitative analysis, aimed at exploiting temporary market inefficiencies. Particular attention is dedicated to portfolio construction, to avoid unintentional bias and ensure an optimal use of the relative risk budget.

INTERFUND BOND GLOBAL EMERGING MARKETS

The Sub-Fund positioning has been skewed towards low-beta names over the year while being also focused on selective High Yield Country Issuers with idiosyncratic risks. The Sub-Fund was net long US Treasuries, specifically during the first 7 months of the business year (October 2023-April 2024). The Sub-Fund took positions in selected Emerging Markets FX vs. USD (both long and short) over the period.

The Sub-Fund returned a positive net performance over the period (net of fees) due to three main factors:

1. During the last 12 months overweight positions in Ecuador, Venezuela, Argentina, Egypt, Guatemala and Colombia were the strongest contributors to the performance as well as position in US Treasuries
2. In October-December 2023 strong outperformance of the Sub-Fund was attributed to overweight position in US Treasuries and selective High yield countries (Venezuela, Colombia, Egypt)
3. Short positions in CDX Emerging Markets (EM) index, Chinese offshore bonds were drags on the annual performance as well as long in US Treasuries (in January-April 2024)

The Sub-Fund is currently relatively neutral positioned in Credit risk overall vs. benchmark (beta adjusted), selectively overweight EM BB-rated issuers (Colombia, Guatemala, South Africa) while underweighting Eastern European Countries with most evident credit quality deterioration. The Sub-Fund also selectively over-weights Countries that benefit from lower DM rates or Countries with ongoing strong reform agenda. The Sub-Fund has tactically reduced long in US Treasuries on the back of strong rally, while it may increase the exposure again as real yields in DM remain elevated. Emerging Market credit continues to require active management and selective exposure given ongoing debt sustainability challenges, still tangible share of defaulted names that are subject to ongoing/future restructuring and elevated geopolitical risks.

INTERFUND EQUITY GLOBAL EMERGING MARKETS

During the reference period the Sub-Fund performance was +9.2% trailing the reference benchmark by less than 1%. The underperformance is mainly explained by the management fees and the booking of capital gain tax payable, related to the investment in the Indian market. During the period, the Sub-Fund increased the structural overweight to the Southeast Asian region (Indonesia and Philippines in particular) and also increased the underweight to the Indian markets where valuations are becoming quite demanding.

More recently, the Sub-Fund increased the exposure to Brazil and Mexico where valuations are more attractive and seem to discount the concerns related to the government fiscal policies and constitutional reform (for Mexico). The relative exposure to the Chinese market was kept stable during the period. While the market is trading at historically low valuations, the geopolitical concerns and the weak macroeconomic outlook have been weighting on the market performance and must be taken into consideration for risk management purposes.

Going forward equity emerging markets should benefit from the expected monetary pivot in US, allowing Emerging Markets central banks to run a less restrictive monetary policy. There are significant differences in terms of valuations among markets that should reward a more active investment strategy. The Sub-Fund strategy is mainly focused on identifying companies with good long-term outlook, strong competitive position trading at attractive prices. The country allocation is managed taking into consideration of macroeconomic outlook and risks but it's mainly the results of bottom-up opportunities.

INTERFUND INTERNATIONAL SECURITIES NEW ECONOMY

During the reference period, the performance of the Sub-Fund Interfund International Securities New Economy was +29.02%, while that of its benchmark was equal to +29.48%.

The Sub-Fund's relative performance is highly impacted by relative risks that can not be mitigated due to regulatory investment limits. In this regard, during the reference period the benchmark's composition included several constituents with a weight above the 10%. The overweight to Palantir was one of the major positive contributors, whereas the imposed underweight in several mega-cap stocks had a strong negative impact on the relative performance.

Outlook: During the reference period, the investment process of the Sub-Fund was improved, especially for what concerns the portfolio construction. The Sub-Fund's management team adopts a quality-growth approach that should be source of positive excess returns over the medium-long term. The strategy is supposed to work in efficient markets such as the Japanese blue-chip segment.

Additional layers of discretionary choices are based on a mix of quantitative and qualitative analysis, aimed at exploiting temporary market inefficiencies.

INTERFUND EMERGING MARKETS LOCAL CURRENCY BOND

Over the 12-month period as of 31 August 2024, the Sub-Fund returned a positive performance net of fees but slightly underperformed its benchmark in the unhedged share class.

Contributors: Overweight exposure to the Turkish Lira, to the Egyptian Pound and to the Indian Rupee, as the Sub-Fund benefitted from carry trade activities on these currencies over the year.

Overweight positioning in Peruvian local duration, as the central bank started cutting rates in 2023 in the attempt to ease borrowing costs and avoid a recession and has continued along its easing path as inflation progressively cooled down and got closer to target levels.

Overweight positioning in Dominican local duration, as the central bank announced cuts for an amount of 175 basis points since May 2023, on the back of expectations of looser global monetary conditions, coupled with the country's strong macroeconomic fundamentals and solid future growth prospects.

Tactical overweight and underweight positioning over the U.S. yield curve, in order to exploit the various temporary movements at different maturities.

Detractors: Overweight exposure to the Brazilian Real, as the currency kept depreciating over the year, weakening by nearly 12% against the U.S. dollar in 2024 due to investors' concerns regarding the country's fiscal deficit and the challenges of rising inflation expectations; however, the central bank has declared to be ready to raise rates in order to sustain the local currency.

Overweight positioning in Mexican local duration and in the Mexican Peso, as the country's interest rates rose in the longer part of the curve, where the Sub-Fund had a modest overweight exposure, while decreasing for shorter maturities, and the currency kept depreciating, especially after this summer's release of U.S. labor market data which negatively surprised global markets.

Underweight positioning in Polish local duration, as yields broadly fell over the year; the underweight was closed at the end of June 2024.

Positioning: The Sub-Fund is currently overweight duration (6.06yrs) vs. the benchmark (5.28yrs). On the currency front, the Sub-Fund remains overweight to a basket of Emerging Markets currencies

(Turkey, Egypt, Dominican Republic and India are the largest overweights) and is currently underweight to Kuwait, China, Canada and New Zealand. While central banks of Developed Markets are committed to driving inflation down “the last mile” to their target of 2%, the uncertainty surrounding their policy path has led EM central banks to take a wait and see approach to cutting rates. This will likely result in prolonged high short-term real rates that reduce FX volatility and preserve carry, supporting EM FX; consequently, the Sub-Fund is taking FX exposure in countries with high forward-looking real rates, currencies with high carry, and those that have experienced positive monetary policy pivots (such as Turkey).

In local duration, the Sub-Fund increased exposure to high quality names like Dominican Republic, Peru and Poland, while reducing exposure to Thailand and Israel.

Overall, the Sub-Fund favors local duration in countries with benign inflation, credible central banks and support from commodity gains (South Africa and Peru).

Overall, a constructive backdrop and relatively resilient fundamentals support a constructive positioning: the Sub-Fund remains focused on keeping the overall quality of the portfolio high, with sufficient cash levels in order to be able to take advantage of opportunities in a higher volatility environment.

INTERFUND SYSTEM EVOLUTION

The Sub-Fund started this period overweight Credit and interest rates duration on the back of historically high yields and spreads above average. In the second half of the year the asset allocation did not change substantially except for a slight reduction in the level of risk given the tightening in Credit spreads and expectations of moderate economic growth.

In terms of performance, given the investment policy change occurred in December 2023, the Sub-Fund, now actively managed against a benchmark, has outperformed, since then, by 40.6 basis points (4.509% vs 4.103%) with a total return of 7.418% during the whole 2024 financial year.

Positive contributors came from a long position in Bank and non-financial subordinated paper. Other positive contributions came from the overweight in BBB rated issuers and the underweight in Cash.

The largest detractors were the underweight in real estate issuers and the tail risk hedge on high yield bonds.

Going forward the Sub-Fund will keep on reducing exposure to the market aiming to reach a more neutral positioning against the Benchmark.

INTERFUND EURO BOND SHORT TERM 3-5

During the past twelve months, the Sub-Fund has been invested in a wide variety of EU sovereign bond markets. At various times throughout the year, duration positions were taken across these markets. Tactical FX and Fixed Income future and option positions were also undertaken.

EU sovereign yields have declined modestly over the past 12 months with considerable volatility over the period. A monetary policy easing cycle has commenced in Europe although persistent domestic and services inflation has meant the pace of easing has been measured.

The Sub-Fund performance, like all long duration funds, was initially hindered by high policy rates. Performance turned positive, improving on the prior year as rate cut expectations built, and policy easing was delivered, but slightly lagged its reference benchmark.

The evolution of Inflation and Employment data will be examined closely to determine the length and depth of the current easing cycle. While markets expect a steep cutting cycle in the year ahead, any additional deterioration in economic performance will provide opportunity to add overweight duration.

INTERFUND FLEXIBLE BOND SHORT TERM

The Sub-Fund accrued performance steadily and consistently through the period on the back of a broadly supportive macro environment for short dated credit. 2yr German yield began the period close to the wide of the current cycle at 3% and traded in a range between c. 2.5-3%. This proved supportive for credit markets in particular for short dated bonds. In the first half of the period the Sub-Fund maintained a rate duration of 0. With the changing narrative on inflation and increasing probability of rate cuts the Sub-Fund took a rate position of 0.3 and in the closing quarter as the ECB introduced a 25bps cut, the German 2yr closed the period at c. 2.2%.

The Sub-Fund began the period with an allocation of 50% government, 45% corporate and 5%, which was broadly maintained for the period. Within the corporate portion of the portfolio, exposure to financials was increased through the period.

Spreads initially widened in September and into October with a significant escalation in tensions in the middle east. With all yields looking attractive on a multiyear look back, credit, particularly short dated credit saw an increased volume of inflows which drove demand and spread tightening. Throughout this period the Sub-Fund benefit from extending spread duration as bonds rolled down the curve and with reinvestment in the 3-4yr point. Volatility generated due to escalations of tensions in the middle east, French political uncertainty and changes in inflation/growth expectations did generate spread widening. However, given the elevated levels of demand for credit, and again particularly short duration credit, spreads rebounded quickly finishing the year c. 5bps from the tights in the 1-5yr section of the curve. Spread duration was in a range between 1.5-1.8 for the first 3 quarters of the period. The Sub-Fund showed a preference for high quality senior financial issuers in both secondary and primary markets, which added additional spread carry to the Sub-Fund.

In the final quarter, with credit valuations trading at the tighter end of their historical range, the Sub-Fund has reduced spread duration to 1.15 with expectations of limited scope for further meaningful tightening in the short term. As such the Sub-Fund is positioned to continue to benefit from carry and roll down of its existing portfolio.

The Sub-Fund expects to retain its defensive positioning and retain high cash levels with valuations at current levels. Expected volatility due to geopolitics and the US election should provide volatility and opportunity to deploy capital at more attractive levels.

Performance of the Sub-Fund period was 4.06% and the main contributor to performance was curve roll down and carry, spread tightening particularly in financials and duration positioning.

The biggest detractor to performance was due to volatility caused by the French elections in June and an elevated bout of volatility in August which saw spreads sell off aggressively.

INTEFUND TEAM EQUITY EUROPE

Over the year, the Sub-Fund posted a positive performance in both absolute and relative terms, thanks to the positive contribution from tech, healthcare, financials; pharma benefited from exposure to the obesity theme through Novo and Zealand and from the good performance of Lonza. A positive impact also came from the overweight of semiconductors, mainly semi-caps, and more generally from Artificial Intelligence, not just within the technology sector. In financials, some UK exposures, such as Barclays and Lse, and the insurance sector in general, performed well.

During the period, the negative contributions largely arose from incorrect stock picking on the staples side; Campari remained under pressure due to M&A and a recovery of the US market that is slow to manifest itself. The slow start to the summer of 2024 also weighed on the results of beer producers, Heineken and Carlsberg, the latter also weighed down by the bid on Britvic. At the same time, the rotation that took place since end Q1 24 saw tobacco stocks moving upwards largely disconnected from fundamentals. Nestlé underperformed as the company's growth engines gradually ran out of steam, and the position was replaced by Unilever.

The contributions of other sectors were marginally positive, with no significant differences from the benchmark.

Over the summer, market movements were characterized by considerable erraticism, reflecting a level of low conviction typical of phases of monetary policy reversal. The prospect of a “soft landing” that remains our base case, contrasts with the possibility that the Fed intervenes after the damage has been done, with a deterioration in the labor market well underway and, therefore, a potential recession looming. If we look at the entire period, Recession worries have nevertheless prevailed in this period, inducing an underperformance of cyclicals vs defensives; on top, partly due to an underlying de-grossing dynamic, this was accompanied by a value nuance with increases in generally under-held parts (e.g. tobacco) and a simultaneous exit from the most crowded trades (Aerospace & Defense, AI). The parts of the market most sensitive to significantly lower rates, such as utilities and real estate, also performed well.

Overall, a market with a defensive/value bias in addition to de-grossing and short covering, favoured a broadening of participation. Over the last month we have tactically reduced technology, while maintaining an overweight in semiconductors, and health care where technical and more stretched valuations are combined with a lack of potential positive catalysts in the second part of the year. On the other hand, we have increased the real estate sector, mainly euro area, more sensitive to potentially much lower rates over an 18-month horizon.

We are therefore overweight in utilities, Real Estate and consumer discretionary (Overweight retail with UW luxury), compared to underweight in staples, industrials and health care.

INTEFUND EURO INFLATION LINKED

During the past twelve months, the Sub-Fund has been invested in the four major EU sovereign inflation linked markets (Germany, France, Italy & Spain). At various times throughout the year, duration positions were taken across these markets. Tactical FX and Fixed Income future and option positions were also undertaken.

Euro area HICP has dropped from 5.2% in August 2023 to 2.2% in August 2024. The drop in core inflation has been less pronounced but the trend is clear. Break even inflation rates in Europe have steadily declined and 10-year breakeven levels are approximately 50 basis points lower over the past 12 months.

The Sub-Fund posted a slight positive performance over the financial year as markets priced less restrictive ECB policy due to declining inflation. However, due to some large and volatile price movements, the Sub-Fund underperformed the benchmark.

Having cut rates in June, the ECB appear to be on a gradual easing path. With inflation much more benign and economic performance dissipating, further rate adjustments seem likely. Services inflation, along with the oil price, will be key determinants of future inflation direction.

INTERFUND US INFLATION LINKED

During the past twelve months, the Sub-Fund has been invested in all areas of the TIPS curve out to 2053, as well as in Canadian inflation linked bonds at the shorter end of the curve. At various times throughout the year, duration positions were taken across all areas of the curve. Tactical FX and Fixed Income future and option positions were also undertaken.

U.S CPI has dropped from 3.7% in August 2023 to 2.9% in August 2024. The drop in core inflation has been less pronounced but the trend is clear. Break even inflation rates have steadily declined and 10 year breakeven levels are approximately 25 basis points lower over the past 12 months.

The Sub-Fund posted a positive performance over the financial year as markets priced less restrictive Federal reserve policy due to declining inflation. However, due to some large and volatile price movements, the Sub-Fund underperformed the benchmark.

The Federal reserve appear to be much less concerned with the inflation side of their mandate and are shifting their focus to the employment situation. However, with the upcoming US election and prevailing geopolitical uncertainty, oil price movements will need to be monitored in relation to inflation direction. The bank seems likely to cut rates, but markets may be ultimately disappointed by the speed and depth of the cutting cycle.

INTEFUND EUROPEAN UNION BOND (previously INTERFUND SOVEREIGN CORE)

During the past twelve months, the Sub-Fund transitioned from investing in the core EU sovereign bond markets, to investing in European Union issued bonds. Investments covered a variety of maturities out to 2054. At various times throughout the year, duration positions were taken across these markets.

At the start of the financial year in September, the ECB raised interest rates. Fears of lingering inflation initially pushed rates higher. However, towards the end of 2023, markets became confident that inflation was coming under control and rates retraced.

The Sub-Fund performance was strong due to strong E.U bond markets performance over the past 12 months. Spreads tightened and rates declined. However, hopes of E.U bonds being included in benchmark indices did not materialize. The Sub-Fund underperformed its benchmark, introduced in December 2023.

The evolution of Inflation and Employment data will be examined closely to determine the length and depth of the current easing cycle. The inclusion of E.U bonds into mainstream benchmarks would be a key positive.

INTEFUND BTPs 1-10 (previously INTERFUND SOVEREIGN SPREAD)

During the past twelve months, the Sub-Fund transitioned from investing in Italian, Spanish, Portuguese and Irish sovereign bond markets, to investing in Italian government bonds. Investments covered a variety of maturities out to ten years. At the start of the financial year in September, the ECB raised interest rates. The Italian ten-year rate peaked at 4.98% in October. However, towards the end of 2023, markets became confident that inflation was coming under control and rates retraced.

The Sub-Fund performance (+3.5% in absolute terms) was strong due to strong Italian bond markets performance over the past 12 months. Spreads tightened across all parts of the curve and rates declined. The Sub-Fund underperformed its benchmark (introduced in December 2023).

The evolution of Inflation and Employment data will be examined closely to determine the length and depth of the current easing cycle. A prudent Italian budget will likely continue to aid BTP performance.

INTERFUND MULTI THEMATIC

During the reference period, the performance of the Sub-Fund Interfund Mult Thematic was +24.22%, while that of its benchmark (MSCI All-Country World) was equal to +19.14%.

The relative performance of 5.09% was driven by an overweight in Information Technology, Utilities, and Healthcare sectors, with notable contributions from Teradyne Inc, Vistra Corp, and Abbvie Inc respectively.

The Sub-Fund invests adopting a thematic approach, reviewing monthly the allocation to a basket of selected investment themes. Each basket is managed bottom-up, with no predominant style bias. Portfolio construction has been improved during the year, and it makes use of index futures to ensure an optimal use of the relative risk budget.

INTERFUND EQUITY TACTICAL ALLOCATION - first NAV 05/12/2023

Since the inception the Sub-Fund has been invested in short term European government and supranational bond with a short-term maturity. The performance of the Sub-Fund has been supported by the carry earned on these positions. On top of the government bond portfolio, the fund has been exposed to derivatives aimed to express a view on foreign exchange markets and fixed income markets.

The Sub-Fund had structures on OTC options playing the possible rise of Yen vs Swiss Franc and the depreciation of Chinese CNH vs US Dollar. Both structures did not have a positive contribution to the Sub-Fund performance, expiring worthless. During the period the Sub-Fund also played possible rise in interest rate through put on fixed income futures, that provided some temporary support to the Sub-Fund performance. However, the rise in interest rate where limited in term of yield change.

The Sub-Fund maintains a structure highly flexible, aimed to be exposed to low probability-high reward bets. Net total return for the period was 0.90%. The Sub-Fund expects to continue to benefit from carry across the exposure to short term European government and supranational bond portfolio while also selectively gaining from derivatives positions on fixed income and foreign exchange markets.

INTERFUND BOND TACTICAL ALLOCATION - first NAV 05/12/2023

Since the inception the Sub-Fund has been invested in short term European government and supranational bond with a short-term maturity. The performance of the Sub-Fund has been supported by the carry earned on these positions. On top of the government bond portfolio, the Sub-Fund has been exposed to derivatives aimed to express a view on equity markets and equity volatility both in Europe and USA.

The Sub-Fund had structures playing possible increase in volatility of equity markets, especially in USA through listed options on implied volatility and long option strategies on the US index S&P500 protecting the downside of equity markets. Both structures had a positive contribution to the Sub-Fund performance. The Sub-Fund maintains a structure highly flexible, aimed to be exposed to low probability-high reward bets. Net total return for the period was 9.10%. The Sub-Fund expects to continue to benefit from carry across the exposure to short term European government and supranational bond portfolio while also selectively gaining from derivatives positions on equity index and equity volatility markets.

Independent auditor's report

To the Shareholders of
INTERFUND SICAV

Opinion

We have audited the financial statements of INTERFUND SICAV (the "SICAV") and of each of its sub-funds, which comprise the statement of net assets, the portfolio, the commitments on future contracts, the option contracts, the forward foreign exchange contracts, the swap contracts and the contracts for difference as at 31 August 2024, and the statement of changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the SICAV and each of its sub-funds as at 31 August 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the SICAV in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the SICAV is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

Building a better
working world

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the SICAV for the financial statements

The Board of Directors of the SICAV is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the SICAV determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the SICAV is responsible for assessing the SICAV's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the SICAV either intends to liquidate the SICAV or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “réviseur d’entreprises agréé” for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d’entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the SICAV's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the SICAV.
- Conclude on the appropriateness of the Board of Directors of the SICAV's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the SICAV's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the SICAV or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ernst & Young

Interfund Bond Tactical Allocation¹

¹The Sub-Fund was launched on 5 December 2023.

The investment policy of the above mentioned Sub-Funds is detailed in the Prospectus available at the registered office of the SICAV.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment in transferable securities (UCITS) and with generally accepted accounting principles. The financial statements have been prepared on a going concern basis, using the last official/tradeable net asset value of the financial year (30 August 2024).

a) Combined Statements

The SICAV's Combined Statements of Net Assets is the sum of the Statements of each Sub-Fund as at 31 August 2024. There are no Cross Sub-Funds' investments (i.e. where one Sub-Fund has invested in another Sub-Fund of the SICAV) as at 31 August 2024.

b) Net Asset Value per Share

The Net Asset Value of each Sub-Fund is equal to the difference between the total assets and the liabilities of the Sub-Fund.

The Net Asset Value per Share of each Class of Shares is calculated by dividing the Net Asset Value by the number of Shares outstanding on the day of calculation in the respective Classes of Shares.

c) Valuation of investments in securities

The value of all portfolio securities and money market instruments or derivatives that are listed on an official stock exchange or traded on any other regulated market is based on the last available price on the principal market on which such securities or money market instruments or derivatives are traded. If such prices are not representative of the fair value, such securities, money market instruments or derivatives as well as other permitted assets, the value of such securities and money market instruments or listed derivatives is defined by the Board of Directors of the SICAV based on the reasonably foreseeable sale proceeds determined prudently and in good faith.

The value of securities and money market instruments which are not quoted or dealt in on any regulated market is based on the last available price, unless such price is not representative of their true value; in this case, they may be valued at a fair value at which it is expected that they may be resold, as determined prudently and in good faith by and under the direction of the Board of Directors of the SICAV.

The value of the investment in investment funds shall be based on the last available valuation. Generally, investment in investment funds will be valued in accordance with the methods described in the instruments governing such investment funds. These valuations shall normally be provided by the fund administrator or valuation agent of an investment fund. To ensure consistency within the valuation of each Sub-Fund, if the time at which the valuation of an investment fund was calculated does not coincide with the valuation time of any Sub-Fund, and such valuation is determined to have changed materially since it was calculated, then the Net Asset Value may be adjusted to reflect these changes as determined in good faith by and under the direction of the Board of Directors of the SICAV.

d) Valuation of securities lending

The SICAV may lend securities included in its portfolio to a borrower through a third party broker. The assets continue to be valued as part of the portfolio of the SICAV. If the prices of securities lent are not representative of their fair value, all such securities will be valued at their fair value at which it is expected they may be resold as determined in good faith by or under the direction of the Board of Directors of the SICAV. Securities lending generates additional income for the SICAV according to the contracts; the remuneration is recorded under the heading "Securities lending, net" in the Statement of Changes in Net Assets.

e) Income recognition

Interest income is recorded on an accrual basis and dividend income is recorded on a dividend ex-date basis, net of withholding tax if any.

As referred to in Note 16, dividend and interest income from Russian securities is currently not included in the NAV and will be recorded in the event of removal of the sanctions and the consequent availability of such income to the relevant Sub-Funds.

f) Net realised profit / (loss) on sale of investments

Investments in securities are accounted for on a trade date basis. Net realised profit / (loss) on sale of investments in securities are based on the average cost basis. The net realised profit / (loss) and change in net unrealised appreciation / (depreciation) on investments are recorded in the Statement of Changes in Net Assets.

g) Transaction costs

Transaction costs are charged by State Street Bank International GmbH for the processing of the SICAV's transactions. Transaction costs are included under the heading "Other charges and taxes" of the Statement of Changes in Net Assets.

h) Allocation of expenses

All the expenses directly and exclusively attributable to a certain Sub-Fund are borne by that Sub-Fund. If it cannot be established that the expenses are directly and exclusively attributable to a certain Sub-Fund, they will be borne proportionally by each Sub-Fund.

i) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the market forward rates applicable on the valuation date for the remaining period from valuation date to maturity date. The unrealised profits or losses on forward foreign exchange contracts are disclosed in the Statement of Net Assets under the heading "Unrealised profit / (loss) on forward foreign exchange contracts".

j) Future contracts

Futures contracts are valued using quoted daily settlement prices established by the stock exchange on which they are traded. The SICAV and the broker agree to exchange an amount of cash equal to the daily fluctuations in the value of the futures contract (the "variation margin"). For open futures contracts, unrealised profits or losses are recorded in the Statement of Net Assets under the heading "Unrealised profit / (loss) on futures contracts". Variation margin are recorded in the Statement of Net Assets under the heading "Other banks and broker accounts".

Unrealised profits and losses on future contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on future contracts".

k) Swap contracts

Swaps are, in general, contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s).

Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparty.

Credit Default Swaps and Interest Rate Swaps are valued by reference to the net present value of the expected future cash flows based on the market interest rates and the markets expected default and recovery rate of the underlying asset. Total Return Swaps are valued by reference to the mark to market value based on the market value of the underlying asset. The estimated market value is based on the valuation elements laid down in the contracts, and is obtained from third parties pricing agents, market makers or internal models.

Swap premium is recorded in the Statement of Net Assets under the heading "Interest receivable / (payable) on swap contracts".

Unrealised profits or losses on swap contracts are recorded in the Statement of Net Assets under the heading "Unrealised profit / (loss) on swap contracts".

Credit Default Swap contracts are presented at clean price; therefore interest receivable and payable on swap contracts is recorded in the Statement of Net Assets under the heading "Interest receivable / (payable) on swap contracts" and in the Statement of Changes in Net Assets under the heading "Interest / (Interest paid) on swaps and contracts for difference".

l) Option contracts

Option contracts quoted on an official stock exchange or on another regulated market are valued according to the last known market price where the contracts were negotiated by the SICAV or, if there are several markets, according to the last known price of the principal market.

Option contracts not quoted on an official stock exchange or on another regulated market are valued at their last known market value or, in the absence of a market value, according to their probable market value in the reasonable estimation of the Board of Directors of the SICAV.

In the case of options on futures, no premium margin is required because here a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting gains and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process.

Unrealised profits and losses are recorded in the Statement of Net Assets. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

Market value of option contracts is recorded in the Statement of Net Assets.

The variation of unrealised profits and losses on option contracts are recorded in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on option contracts".

m) Contracts for difference

In a contract for difference, two parties commit to exchange payments, which replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference are valued at the closing price of the underlying instrument less the financing costs attributable to the relevant contract. When a contract for difference is concluded, the Sub-Fund may be required to deposit an amount ("initial margin") that corresponds to a pre-agreed percentage of the contract price in cash and / or other assets

with the broker. The unrealised profit / loss is reported in the Statement of Net Assets. Net realised profit / (loss) and changes in unrealised appreciation / (depreciation) are presented in the Statement of Changes in Net Assets.

Dividends on contract for difference are recognised on the date on which the shares / units concerned are quoted "ex-dividend" and are recognized in the Statement of Changes in Net Assets as dividend received on contracts for difference (for the long positions) and as dividend paid on contracts for difference (for the short positions).

n) Translation of items expressed in foreign currencies

Assets and liabilities in foreign currencies are converted into the base currency of the Sub-Fund at the closing exchange rates of the final day of the financial year.

Income and expenses in currencies other than the base currency of the Sub-Fund are converted into the base currency of the Sub-Fund at the closing exchange rates in force on the day of the transaction.

The resulting realised and unrealised profit or loss made on foreign exchange is included in the Statement of Changes in Net Assets; any unrealised profit or loss on cash positions, receivable on assets and payable on liabilities denominated in currencies other than the base currency of the Sub-Fund being recorded under the heading "Net change in unrealised appreciation / (depreciation) on foreign exchange and forward foreign exchange contracts".

The exchange rates as at 31 August 2024 are the following:

3. BANKS, BANK OVERDRAFTS AND BROKER ACCOUNTS

As at 31 August 2024, the counterparty for the "Banks" and "Bank overdraft" accounts is State Street Bank International GmbH, Luxembourg Branch for all the Sub-Funds. The heading "Other banks and broker accounts" includes cash held with external banks and cash at broker accounts. The heading "Amounts due to brokers" includes amounts payable to brokers.

The heading "Other banks and broker accounts" consists primarily of cash receivable for collateral from the Portfolios' clearing brokers and various counterparties. "Amounts due to brokers" consists primarily of cash payable for collateral to the Portfolios' clearing brokers and various counterparties.

4. SUBSCRIPTION TAX

According to Luxembourg law, the SICAV is not subject to any income tax but is liable to a subscription tax ("Taxe d'Abonnement") at an annual rate of 0,05% of its Total Net Assets, payable quarterly and assessed on the last day of each quarter.

Value of assets represented by shares in other Luxembourgish undertakings for collective investment ("UCI") is exempted from the Taxe d'Abonnement provided that such shares have already been subject to the tax.

5. OTHER CHARGES AND TAXES

The heading "Other charges and taxes" is mainly composed of transaction fee, professional fee and miscellaneous fee.

6. MANAGEMENT FEE

The Management Company, as remuneration for its services, is entitled to receive a management fee calculated and accrued on each Valuation Day based on the Total Net Assets attributable to the relevant Share Class. For the year ended 31 August 2024, the effective rates for each Sub-Fund are the following:

Annual management fee rate by Share Class:		
Sub-Fund	Class A	Class H
Interfund Euro Currency	0,35%	-
Interfund Bond Global High Yield	0,90%	-
Interfund Euro Bond Medium Term	0,55%	-
Interfund Euro Bond Short Term 1-3	0,50%	-
Interfund Euro Bond Long Term	0,55%	-
Interfund Bond US Plus	0,95%	0,95%
Interfund Bond Japan	0,70%	-
Interfund Equity Italy	1,25%	-
Interfund Euro Corporate Bond	0,65%	-

Annual management fee rate by Share Class:		
Sub-Fund	Class A	Class H
Interfund Team Equity USA	1,35%	1,35%
Interfund Global Convertibles	0,85%	-
Interfund Equity Japan	1,25%	1,25%
Interfund Equity Europe	1,25%	-
Interfund Equity Pacific Ex Japan	1,25%	1,25%
Interfund Millennials Equity USA ¹	1,55%	-
Interfund Bond Global Emerging Markets	0,80%	-
Interfund Equity Global Emerging Markets	1,25%	-

Interfund Euro Inflation Linked	0,45%	-
Interfund US Inflation Linked	0,45%	-
Interfund European Union Bond ²	0,45%	-
Interfund BTPs 1-10 ³	0,45%	-
Interfund Multi Thematic	0,30%	-
Interfund Equity Tactical Allocation ⁴	0,45%	-
Interfund Bond Tactical Allocation ⁴	0,40%	-

¹The Sub-Fund Interfund Equity USA Advantage was renamed Interfund Millennials Equity USA on 17 June 2024.

²The Sub-Fund Interfund Euro Sovereign Core was renamed Interfund European Union Bond on 13 December 2023.

³The Sub-Fund Interfund Euro Sovereign Spread was renamed Interfund BTPs 1-10 on 13 December 2023.

⁴The Sub-Fund was launched on 5 December 2023.

In each Sub-Fund of the SICAV, this fee is payable monthly and calculated on the basis of the average Net Asset Value over the month.

With respect to a Sub-Fund investing a substantial portion of its assets in other investment funds, the maximum management fee charged to the Sub-Fund and each of the UCITS and/or other UCIs in which it invests, did not exceed 5% of the relevant net assets under management.

7. PERFORMANCE FEE

Performance fee is paid annually at the end of each calendar year, based on performance of NAV per share of each class separately (after deduction of all expenses, liabilities and management fees but not performance fee), adjusted for investor subscriptions, redemptions and distribution of dividends. In Absolute Return model, the NAV performance is compared to a reference indicator. This indicator is a High on High (highest NAV of all previous periods) increased by annual fixed hurdle value. In Relative Return model, performance fee becomes payable if NAV performance of a Sub-Fund at the end of a calendar year is higher than the performance of a relevant Benchmark Index, even if NAV performance was negative.

The Management Company may earn a performance fee for the following Sub-Funds:

Sub-Fund	Benchmark	Performance fee rate
Interfund Equity Italy	"FTSE Italia All Share Capped" Price Index in EUR, weight at 95% + "ICE BofAML 0-1 Y Euro Government Index" Total Return in EUR, weight at 5%	20,00%
Interfund Global Convertibles	"UBS Thomson Reuters Global Focus Convertible Bond" Total Return Hedged in EUR	20,00%
Interfund Equity Japan	"MSCI Japan" Price Return in JPY, converted in EUR for Class A Shares; "MSCI Japan" Price Return Hedged in EUR for Class H Shares	20,00%

Sub-Fund	Benchmark	Performance fee rate
Interfund Equity Europe ¹	"MSCI Europe" Price Return in USD, converted in EUR	20,00%
Interfund Equity Pacific Ex Japan	"MSCI Pacific Free ex Japan" Price Return in USD, converted in EUR for Class A Shares; "MSCI Pacific ex Japan" Price Return Hedged in EUR for Class H Shares	20,00%
Interfund Millennials Equity USA ^{2, 3}	"MSCI USA Growth" Price Return in USD, converted in EUR	20,00%
Interfund Equity Global Emerging Markets	"MSCI Emerging Markets" Price Return in USD, converted in EUR	20,00%

¹Effective from 13 November 2023, the Sub-Fund Interfund Equity Europe changed the benchmark component from "MSCI Pan-EURO" Price Return in USD, converted in EUR to "MSCI Europe" Price Return in USD, converted in EUR.

²The Sub-Fund Interfund Equity USA Advantage was renamed Interfund Millennials Equity USA on 17 June 2024.

³Effective from 17 June 2024, the Sub-Fund Interfund Millennials Equity USA changed the benchmark component from "MSCI USAGrowth" Price Return in USD, converted in EUR to "MSCI USA Growth 4% issuer capped" Price Return in USD, converted in EUR.

The details of the calculation methods are described in the Prospectus. Performance fees charged during the financial year are detailed in the Statement of Changes in Net Assets of the relevant Sub-Fund, which is available free of charge upon request at the registered office of the SICAV.

The below table shows the actual performance fees charged during the financial year ended 31 August 2024.

Sub-Fund	Classes	Share Class Currency	Amount of performance fees in Sub-Fund Currency	% of the average NAV of the Share Class
Interfund Equity Italy	A	EUR	261 851,74	0,77
Interfund Equity Japan	A	EUR	875 822,34	0,26
	H	EUR	76 981,04	0,20
Interfund Equity Europe	A	EUR	677 774,80	0,31
Interfund Equity Pacific Ex Japan	A	EUR	475 013,51	0,50
Interfund Equity Global Emerging Markets	A	EUR	215 082,14	0,03

For Sub-Fund Interfund Millennials Equity USA (formerly Interfund Equity USA Advantage) there was no performance fee accrued as at 31 August 2024 even if it is subject to performance fees.

8. DEPOSITORY, DOMICILIARY AND CENTRAL ADMINISTRATION FEE

The SICAV has appointed State Street Bank International GmbH, Luxembourg Branch as Depositary and Paying Agent. The Depositary fees are equal to 0,045% (excluding VAT) per year calculated on the basis of the end of month Net Asset Value of each Sub-Fund and payable at the beginning of the following month.

The SICAV has appointed Intesa Sanpaolo Wealth Management S.A. as Domiciliary Agent. The Domiciliary agent is entitled to receive fees out of the assets of the SICAV for an amount of EUR 12 000 per month (excluding VAT).

The central administration fee is equal to 0,135% per year calculated on the basis of the end of month Net Asset Value of each Sub-Fund and payable to the Management Company at the beginning of the following month.

9. SWAP CONTRACTS

During the financial year, certain Sub-Funds have taken out swap contracts. Details of open positions as at 31 August 2024 are disclosed following the Portfolios of the concerned Sub-Funds.

Swaps, comprising Interest Rate Swaps and Credit Default Swaps can be linked to any number of underlying investments and indexes, and swap terms can vary greatly. Cash flows are exchanged based on the underlying. Swap agreements are carried at market value and

the value of the swap agreement is based on a counterparty independent provided price, third party pricing service or valuation model. The model considers various inputs including the market value of the underlying, the risks associated with the underlying and the specific terms of the contract.

10. FORWARD FOREIGN EXCHANGE CONTRACTS, FUTURE CONTRACTS, OPTION CONTRACTS AND CONTRACTS FOR DIFFERENCE

During the financial year, certain Sub-Funds have taken out forward foreign exchange contracts, future contracts, option contracts and contracts for difference. Details of open positions as at 31 August 2024 are disclosed following the Portfolios of the concerned Sub-Funds.

As at 31 August 2024, J.P. Morgan AG is broker for all the future contracts.

As at 31 August 2024, BNP Paribas S.A., Citigroup Global Markets Europe AG, Citigroup Global Markets Ltd., Goldman Sachs International Bank and Morgan Stanley & Co. International PLC are brokers for all contracts for difference.

The counterparties (unquoted options) / brokers (listed options) for the option contracts as at 31 August 2024, are listed below:

11. REDEMPTION OF SHARES

The SICAV's shares are redeemable daily at the current Net Asset Value per share. According to the SICAV's Prospectus, the redemption of shares can be temporarily suspended. During the financial year ended 31 August 2024, no suspension was recorded.

12. BROKERAGE FEES

For the year ended 31 August 2024, the SICAV incurred brokerage fees (composed of broker fees and stamp duties) relating to the purchase or sale of investment securities. These brokerage fees are part of the acquisition cost / sale price of the related assets and, for the year from 1 September 2023 to 31 August 2024, amount as follows (in EUR):

Sub-Fund	Brokerage fees (as part of acquisition cost/sale price of the related assets) in EUR
Interfund Bond Global High Yield	10,05
Interfund Bond US Plus	821,18
Interfund Equity Italy	44 495,13
Interfund Team Equity USA	313 667,08
Interfund Global Convertibles	1,17
Interfund Equity Japan	392 089,98
Interfund Equity Europe	434 786,06
Interfund Equity Pacific Ex Japan	169 813,84
Interfund Millennials Equity USA ¹	53 177,26
Interfund Equity Global Emerging Markets	1 298 276,81
Interfund International Securities New Economy	14 082,23
Interfund Emerging Markets Local Currency Bond	43 067,32
Interfund Team Equity Europe	1 654 947,07
Interfund Multi Thematic	992 527,99
Total	5 411 763,17

¹The Sub-Fund Interfund Equity USA Advantage was renamed Interfund Millennials Equity USA on 17 June 2024.

13. CHANGES IN THE COMPOSITION OF PORTFOLIO

The list of movements in the portfolio composition for the financial year from 1 September 2023 to 31 August 2024 is available free of charge upon request at the registered office of the SICAV.

14. DIVIDEND DISTRIBUTIONS

In accordance with the SICAV's Prospectus, Sub-Funds' profits are not distributed but reinvested.

15. SECURITIES LENDING TRANSACTIONS

SICAV's portfolio securities may be lent to credit institutions and other financial institutions of high standing. The SICAV has the right to request, at any moment, the termination of the contract and the return of securities.

Securities lending is guaranteed by government securities and other bonds with a minimum rating of upper medium grade. Any transaction expenses in connection with such loans are charged to the borrowers.

The SICAV has appointed Intesa Sanpaolo Wealth Management S.A. as Agent for the Securities Lending activity.

Intesa Sanpaolo Wealth Management S.A. is a related party to the Management Company being fully owned by ISP group.

For the financial year ended 31 August 2024 the partner for the lending activity (principal or sub-agent) chosen by the Agent was Goldman Sachs International Bank.

The following summarises the value of securities lent analysed by borrowing counterparty as at 31 August 2024:

Sub-Fund	Currency	Counterparty	Counterparty's country of incorporation	Market Value of Securities Lent (in EUR)	% of Net Assets	% of the Sub-Fund's total lendable assets	Market Value of the collateral received for the securities lent
Interfund Euro Currency	EUR	Goldman Sachs International Bank	United Kingdom	12 249 570,00	6,99%	8,06%	12 461 129,83

Securities lending transactions are entered into by the SICAV under a securities lending agreement. All collateral received by the SICAV under the securities lending agreement is transferred under a title transfer arrangement. The collateral is held in custody by a subcustodian of the depositary for the duration of the transaction.

For the financial year ended 31 August 2024, income and charges arising from securities lending are described in the following table:

¹The Sub-Fund Interfund Euro Sovereign Core was renamed Interfund European Union Bond on 13 December 2023.

²The Sub-Fund Interfund Euro Sovereign Spread was renamed Interfund BTPs 1-10 on 13 December 2023.

16. GLOBAL CONFLICTS

While the ongoing Israeli-Palestinian conflict, and the continuing Russia-Ukraine war outcomes are uncertain, no significant impacts have been registered in terms of going concern or operations during the financial period. The Board of Directors of the SICAV continues to monitor the evolving situation and its potential impact on the financial position of the Sub-Funds impacted.

On 21 August 2023, the Management Company made the decision in relation to the treatment of dividends and coupons received in Russian rouble sanctioned bank accounts in the NAV of two Sub-Funds Interfund Equity Global Emerging Markets and Interfund Emerging Markets Local Currency Bond. Considering that the income is not available to the relevant SICAV due to sanctions and given the uncertainty surrounding the availability of the income, it was decided to exclude such income from the NAV. This caused no significant impact on the relevant SICAV.

17. EVENTS OCCURED DURING THE YEAR

a) Launches, liquidations, mergers and renamings

The following Sub-Funds were launched on 5 December 2023:

- Interfund Equity Tactical Allocation
- Interfund Bond Tactical Allocation

The Sub-Fund Interfund Euro Sovereign Core was renamed Interfund European Union Bond on 13 December 2023.

The Sub-Fund Interfund Euro Sovereign Spread was renamed Interfund BTPs 1-10 on 13 December 2023.

The Sub-Fund Interfund Equity USA Advantage was renamed Interfund Millennials Equity USA on 17 June 2024.

b) Other Business Announcements

Effective from 13 November 2023, the Sub-Fund Interfund Equity Europe changed the benchmark component from "MSCI Pan-EURO" Price Return in USD, converted in EUR to "MSCI Europe" Price Return in USD, converted in EUR.

Effective from 13 December 2023, the Sub-Fund Interfund Team Equity Europe changed from multimanager to single manager strategy. The Sub-Fund is currently managed by Eurizon Capital SGR S.p.A., as appointed by the Management Company of the SICAV.

Effective from 13 December 2023, the SFDR category uplifted to Article 8 for the Sub-Fund Interfund System Evolution.

Effective from 17 June 2024, the Sub-Fund Interfund Millennials Equity USA changed the benchmark component from "MSCI USA Growth" Price Return in USD, converted in EUR to "MSCI USA Growth 4% issuer capped" Price Return in USD, converted in EUR.

Effective from 17 June 2024, the SFDR category uplifted to Article 8 for the Sub-Fund Interfund Millennials Equity USA.

c) Changes in the Board of Directors

Effective 16 April 2024, Mr Gianluca La Calce resigned as Director and Chairman of the Board of Directors. On 29 April 2024, Mr Bruno Alfieri was appointed Chairman of the Board and Mr Matteo Cattaneo was appointed Director of the Board following CSSF approval.

18. INDIAN SECURITIES SUBJECT TO CGT AND TAX ON OTHER INCOME

With effective date 2 October 2023 (the Effective Date), the tax provision policy of the Management Company is to record both Indian CGT and tax on other income (i.e. dividend income, interest income, surcharges and cess) on a cash basis and to record a Indian CGT provision on net unrealized gains. Such Indian CGT provision, that is computed at the level of each security invested, may vary at each Net Asset Value computation day, based on market movements and investment activity.

As of 31 August 2024, the Sub-Fund Interfund Equity Global Emerging Markets (the Sub-Fund) had exposure to Indian securities subject to CGT and tax on other income.

As of 31 August 2024, Indian CGT provision for Interfund Equity Global Emerging Markets amounts to 8 894 013,64 EUR. Indian CGT provision is recorded under the heading "Provision on Capital Gain Tax" in the Statement of Net Assets and it is included in the heading "Net realised profit / (loss) on sales of investments, currencies and other financial instruments" in the Statement of Changes in Net Assets.

19. SUBSEQUENT EVENTS

Effective from 1 January 2025, the Sub-Fund Interfund Equity Global Emerging Markets will change the benchmark from MSCI Emerging Markets Price Return in EUR to MSCI Emerging Markets ex Controversial Weapons 10/40 Net Total Return in EUR.

Collateral Disclosures

As at the balance sheet date all of the cash collateral received in respect of OTC derivatives transactions (including total return swaps), is not part of any reinvestment program.

Non-cash collateral received in respect of securities lending transactions cannot be sold, re-invested or pledged.

Safekeeping of collateral granted is the proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts.

There was no collateral granted during the year ended 31 August 2024.

The following table provides an analysis of the amounts of non-cash collateral received by the SICAV in respect of securities lending transactions held by a custodian, as at the balance sheet date:

	Market Value of Non-cash collateral received
Custodian	Securities lending
State Street Bank International GmbH, Luxembourg Branch	1 004 090 739,47
Total (EUR)	1 004 090 739,47

Non-cash collateral received from the counterparty by way of a security collateral arrangement in relation to OTC derivatives (including total return swaps) is kept in a segregated account.

Sustainable Finance Disclosure Regulation (SFDR)

Sub-Funds categorized under Article 8 of SFDR:

- Interfund Euro Currency
- Interfund Euro Bond Medium Term
- Interfund Euro Bond Short Term 1-3
- Interfund Euro Bond Long Term
- Interfund Equity Italy
- Interfund Euro Corporate Bond
- Interfund Team Equity USA
- Interfund Global Convertibles
- Interfund Equity Japan
- Interfund Equity Europe
- Interfund Equity Pacific ex Japan
- Interfund Millennials Equity USA (formerly Interfund Equity USA Advantage; under Article 8 since 17 June 2024)
- Interfund Bond Global Emerging Markets
- Interfund Equity Global Emerging Markets
- Interfund International Securities New Economy
- Interfund System Evolution
- Interfund Euro Bond Short Term 3-5
- Interfund Team Equity Europe
- Interfund Euro Inflation Linked
- Interfund US Inflation Linked
- Interfund European Union Bond (formerly Euro Sovereign Core)
- Interfund BTPs 1-10 (formerly Interfund Euro Sovereign Spread)
- Interfund Multi Thematic

The above listed Sub-Funds have (E) environmental and (S) social characteristics and promote investment into assets which follow good governance (G) practices in accordance with Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"). The Sub-Funds might invest in activities that are environmentally sustainable which are selected according to their investment policy, but such investments are not per se decisive to the attainment of the SICAV's environmental and/or social characteristics.

In addition to integrating sustainability risks into investment decisions, the Management Company considers ESG factors in the analysis and selection of financial instruments with the aim of achieving an ESG score, calculated at the overall portfolio level, which is higher than the ESG score of the investment universe or of the benchmark, if any, using data from the specialised info-provider "MSCI ESG Research". The ESG score of the Sub-Fund is calculated as a weighted average of the ESG scores of the issuers of the financial instruments in the portfolio.

Without prejudice to the integration of sustainability risk analysis, all Sub-Funds belonging to the SICAV do not, however, promote the specific environmental objectives identified in Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 establishing a framework for sustainable investment and amending Regulation (EU) 2019/2088. The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

Financial products within the Sub-Funds take into consideration Principal Adverse Impact indicators ("PAI"), specifically consider the following indicators:

PRINCIPAL ADVERSE IMPACT (PAI)	PAI CATEGORY
PAI applicable to equity instruments	
Carbon emission (Scope 1 + 2)	Environmental
GHG intensity of investee companies	Environmental
Violations of UNGC principles and OECD guidelines for Multinational Enterprises	Social
Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons)	Social
PAI applicable to government bond and supranationals	
GHG intensity	Environmental
Investee Countries subject to social violations	Social

The other Sub-Funds are currently classified under Article 6 of SFDR.

Outcome:

During the reporting year the Management Company ensured compliance with the sustainability processes established for each category corresponding to Article 6 or 8.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Interfund Bond Global Emerging Markets

Legal entity identifier 549300DPP40E6UGLRI11

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: _%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: _%**

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy).
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

The ESG score of the portfolio was BB.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 89.35% as of 31/08/2024, in comparison to 92.18% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Largest Investments	Sector	% Assets	Country
BKO 0.4 09/13/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	2.77%	Germany
PHILIP 5 1/4 05/14/34	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	1.26%	Philippines
COSTAR 6.55 04/03/34	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	0.93%	Costa Rica

COLOM 8 11/14/35	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	0.69%	Colombia
COLOM 3 7/8 04/25/27	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	0.69%	Colombia

What was the proportion of sustainability-related investments?

● What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 89.35%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (10.65% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be

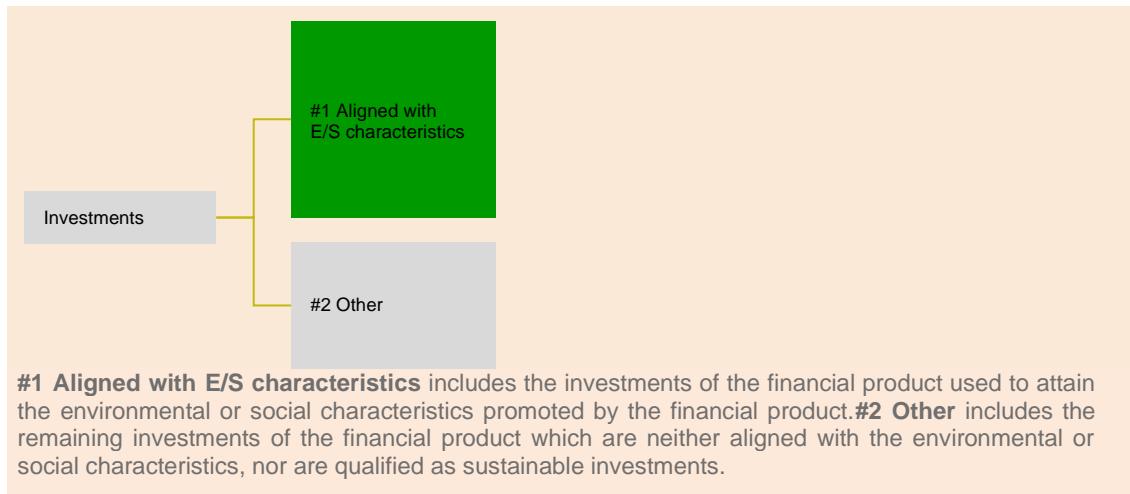

Asset allocation

describes the share of investments in specific

assets.

limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	68.80%
FINANCIAL AND INSURANCE ACTIVITIES	K	13.40%
MINING AND QUARRYING	B	3.68%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	0.98%
Transporting and storage	H	0.78%
MANUFACTURING	C	0.41%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	0.26%
ACTIVITIES OF EXTRATERRITORIAL ORGANISATIONS AND BODIES	U	0.20%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

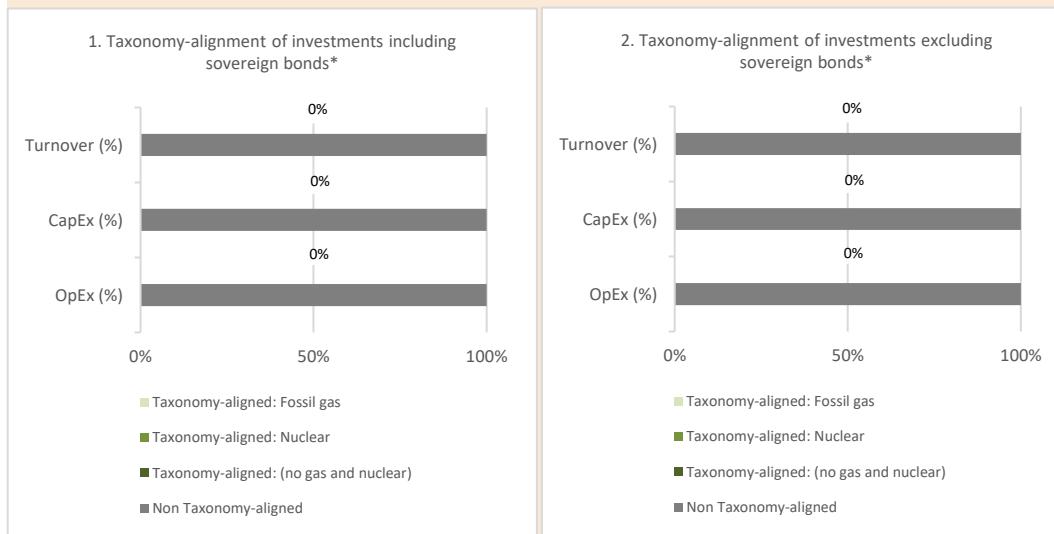

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 21.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Interfund BTPs 1-10

Legal entity identifier 549300H9JPVDRZ6LZU19

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

The ESG score of the portfolio was BBB.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Largest Investments	Sector	% Assets	Country
BTPS 3 08/01/29	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	6.53%	Italy

BTPS 4 3/4 09/01/28	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.55%	Italy

What was the proportion of sustainability-related investments?

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 100%, compared to the minimum

describes the share of investments in specific assets.

threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	0	99.55%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?²

Yes

In fossil gas

In nuclear energy

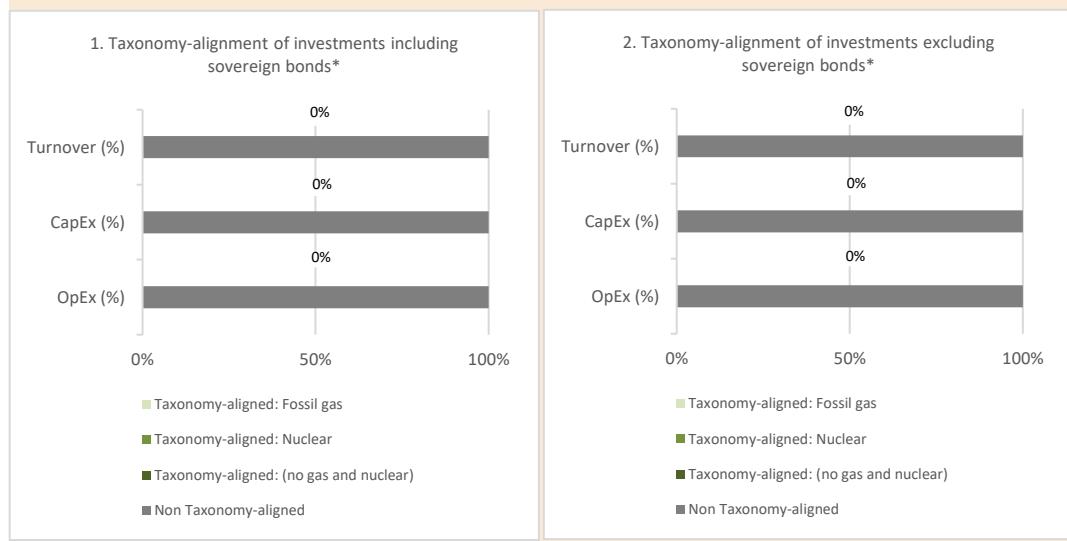

No

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Interfund Equity Europe

Legal entity identifier 5493005OIVXGVNRXHG76

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.72% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the
environmental or social
characteristics promoted
by the financial product
are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 100% as of 31/08/2024, in comparison to 99.69% on the 31/08/2023. In accordance with the investment policy, the sub-fund also made investments promoting sustainability objectives. As of 31/08/2024, the proportion of investments of promoting sustainability objectives was 76.72%, compared to 55.44% as of the 31/08/2023. As of 31/08/2024, the proportion of investments of promoting an environmentally sustainable investment objective was 61.44% compared to 42.62% as of the 31/08/2023. As of the 31/08/2024, the proportion of investments of promoting a socially sustainable investment objective was 76.47% compared to 54.26% as of 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into

account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm ("DNSH") threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company's website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the "Sustainable And Responsible Investment Policy" as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to

violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure**

(Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³**

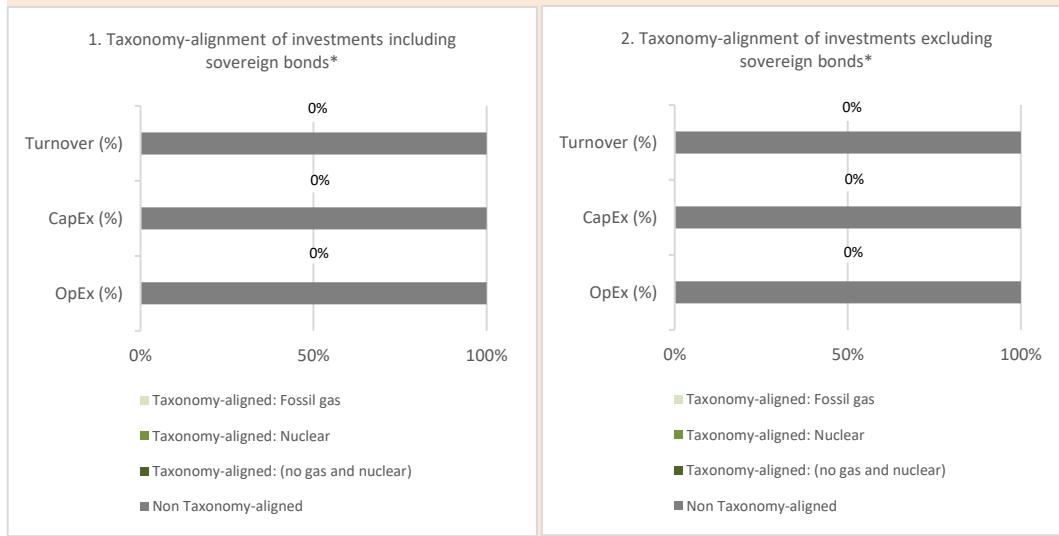

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Interfund Equity Global Emerging Markets

Legal entity identifier 549300HSY2ZGSUB89719

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.05% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the
environmental or social
characteristics promoted
by the financial product
are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

The ESG score of the portfolio was A.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 98.35% as of 31/08/2024, in comparison to 98.52% on the 31/08/2023. In accordance with the investment policy, the sub-fund also made investments promoting sustainability objectives. As of 31/08/2024, the proportion of investments of promoting sustainability objectives was 63.05%, compared to 51.83% as of the 31/08/2023. As of 31/08/2024, the proportion of investments of promoting an environmentally sustainable investment objective was 38.91% compared to 30.56% as of the 31/08/2023. As of the 31/08/2024, the proportion of investments of promoting a socially sustainable investment objective was 60.61% compared to 49.18% as of 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into

account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm ("DNSH") threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company's website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the "Sustainable And Responsible Investment Policy" as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to

violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	MANUFACTURING	9.16%	Taiwan (Province of China)
TENCENT HOLDINGS LTD	INFORMATION AND COMMUNICATION	4.14%	China
SAMSUNG ELECTRONICS CO LTD	MANUFACTURING	3.50%	Korea (the Republic of)
UBS 0 12/22/27	FINANCIAL AND INSURANCE ACTIVITIES	2.28%	Switzerland
ALIBABA GROUP HOLDING LTD	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	2.09%	Cayman Islands
RELIANCE INDUSTRIES LTD	MANUFACTURING	1.55%	India
HDFC BANK LIMITED	FINANCIAL AND INSURANCE ACTIVITIES	1.45%	India
ICICI BANK LTD	FINANCIAL AND INSURANCE ACTIVITIES	1.17%	India
MEITUAN-CLASS B	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	1.13%	Cayman Islands
SK HYNIX INC	MANUFACTURING	1.01%	Korea (the Republic of)
HON HAI PRECISION INDUSTRY	MANUFACTURING	0.94%	Taiwan (Province of China)
INFOSYS LTD	INFORMATION AND COMMUNICATION	0.93%	India
MEDIATEK INC	MANUFACTURING	0.91%	Taiwan (Province of China)
CHINA CONSTRUCTION BANK-H	FINANCIAL AND INSURANCE ACTIVITIES	0.85%	China
PDD HOLDINGS INC	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	0.80%	Cayman Islands

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

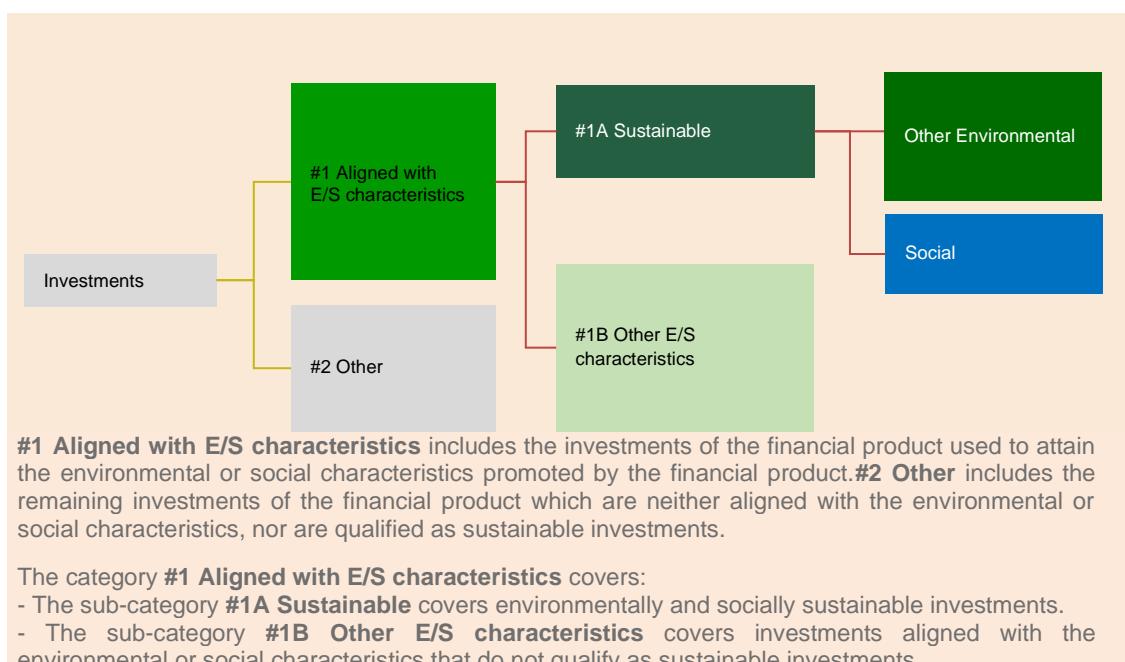

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 98.35%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (1.65% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2024 had a share of sustainable investments equal to 63.05%, compared to the minimum threshold of 20% (box #1A Sustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	38.85%
FINANCIAL AND INSURANCE ACTIVITIES	K	24.39%
INFORMATION AND COMMUNICATION	J	11.66%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	9.65%
MINING AND QUARRYING	B	2.45%
Transporting and storage	H	2.14%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	1.68%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	1.51%
REAL ESTATE ACTIVITIES	L	1.20%
CONSTRUCTION	F	1.11%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.99%
PROFESSIONAL, SCIENTIFIC AND	M	0.97%

TECHNICAL ACTIVITIES		
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.74%
EDUCATION	P	0.18%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.09%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ⁴**

Yes

In fossil gas

In nuclear energy

No

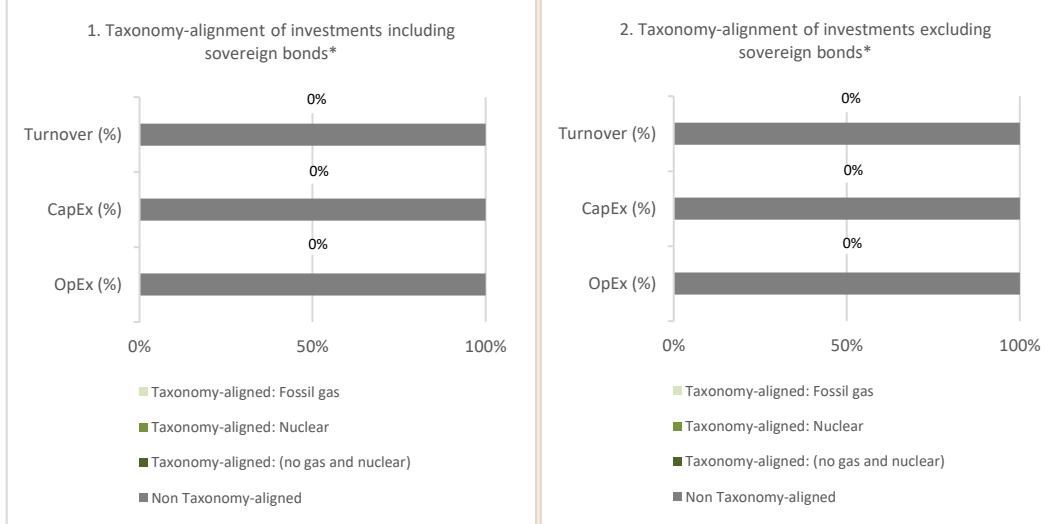

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

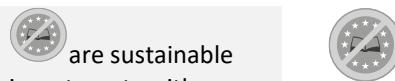

⁴ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/24, invested 38.91% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/24, invested 60.61% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.
- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the

external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund Equity Italy

Legal entity identifier 549300NJFB67X8RXPT88

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.41% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the
environmental or social
characteristics promoted
by the financial product
are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

The ESG score of the portfolio was A.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 92.64% as of 31/08/2024, in comparison to 90.08% on the 31/08/2023. In accordance with the investment policy, the sub-fund also made investments promoting sustainability objectives. As of 31/08/2024, the proportion of investments of promoting sustainability objectives was 72.41%, compared to 47.65% as of the 31/08/2023. As of 31/08/2024, the proportion of investments of promoting an environmentally sustainable investment objective was 55.58% compared to 35.65% as of the 31/08/2023. As of the 31/08/2024, the proportion of investments of promoting a socially sustainable investment objective was 71.54% compared to 46.52% as of 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into

account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm ("DNSH") threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company's website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the "Sustainable And Responsible Investment Policy" as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to

violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund's Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 92.64%, compared to the

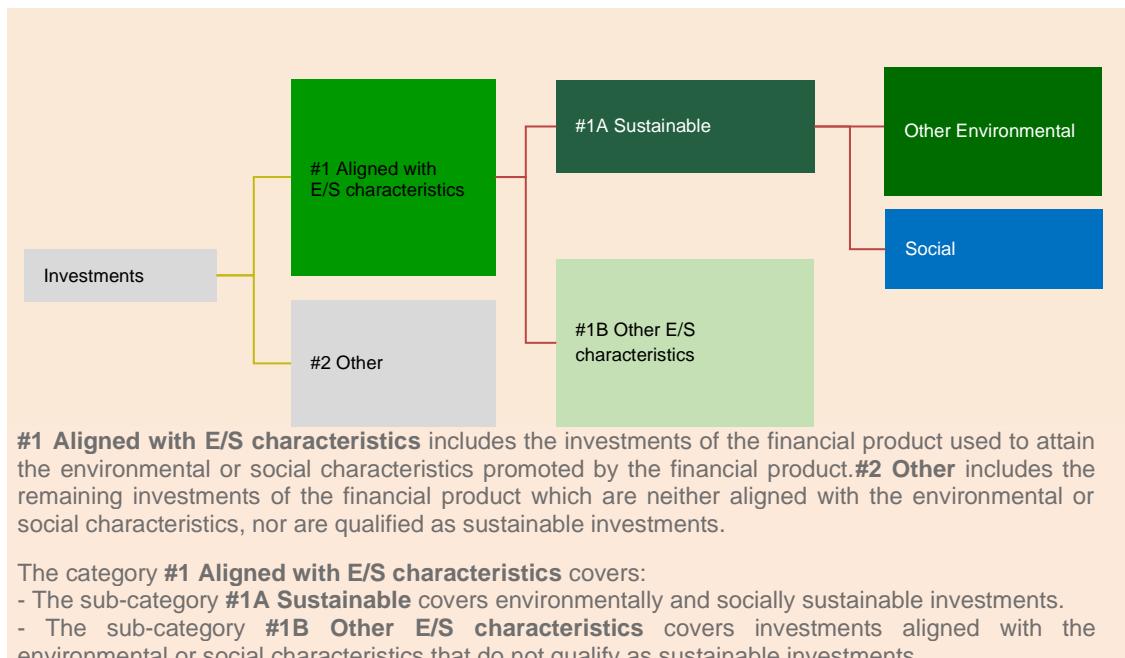

describes the share of investments in specific assets.

minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (7.36% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2024 had a share of sustainable investments equal to 72.41%, compared to the minimum threshold of 30% (box #1A Sustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	38.66%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure**

(Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?⁵**

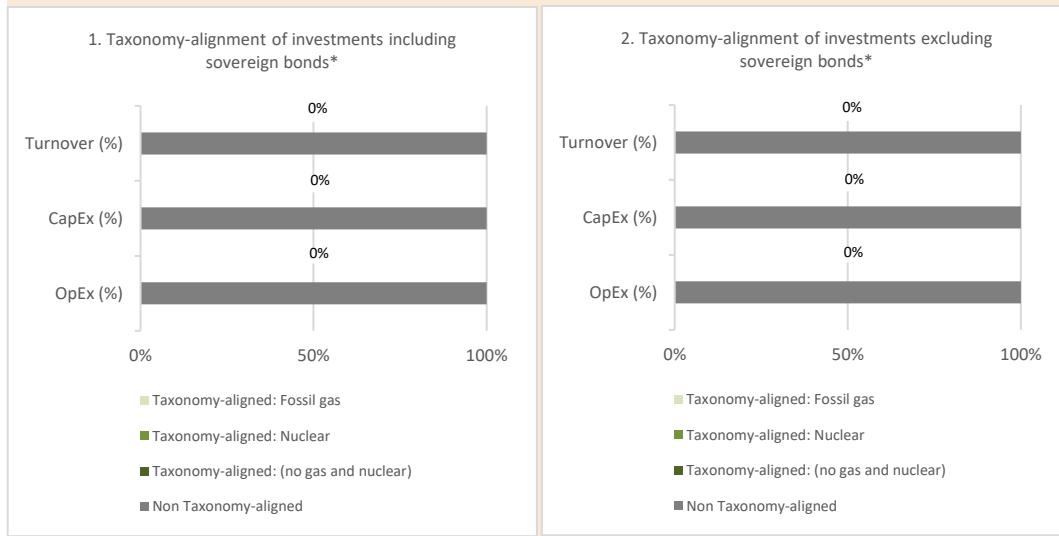

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

⁵ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund Equity Japan

Legal entity identifier 549300CJEGOEC2X52C12

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 75.25% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the
environmental or social
characteristics promoted
by the financial product
are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 100% as of 31/08/2024, in comparison to 100% on the 31/08/2023. In accordance with the investment policy, the sub-fund also made investments promoting sustainability objectives. As of 31/08/2024, the proportion of investments of promoting sustainability objectives was 75.25%, compared to 70.62% as of the 31/08/2023. As of 31/08/2024, the proportion of investments of promoting an environmentally sustainable investment objective was 45.34% compared to 39.92% as of the 31/08/2023. As of the 31/08/2024, the proportion of investments of promoting a socially sustainable investment objective was 71.92% compared to 62.11% as of 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into

account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm ("DNSH") threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company's website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the "Sustainable And Responsible Investment Policy" as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to

violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company's website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the "Sustainable And Responsible Investment Policy" as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Largest Investments	Sector	% Assets	Country
COMMONWEALTH BANK OF AUSTRAL	FINANCIAL AND INSURANCE ACTIVITIES	8.19%	Australia
BHP GROUP LTD	MINING AND QUARRYING	7.20%	Australia
CSL LTD	MANUFACTURING	5.36%	Australia
NATIONAL AUSTRALIA BANK LTD	FINANCIAL AND INSURANCE ACTIVITIES	4.34%	Australia
AIA GROUP LTD	FINANCIAL AND INSURANCE ACTIVITIES	4.15%	Hong Kong
WESTPAC BANKING CORP	FINANCIAL AND INSURANCE ACTIVITIES	3.77%	Australia
AUST AND NZ BANKING GROUP	FINANCIAL AND INSURANCE ACTIVITIES	3.49%	Australia
DBS GROUP HOLDINGS LTD	FINANCIAL AND INSURANCE ACTIVITIES	2.86%	Singapore
MACQUARIE GROUP LTD	FINANCIAL AND INSURANCE ACTIVITIES	2.83%	Australia
WESFARMERS LTD	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	2.81%	Australia
OVERSEA-CHINESE BANKING CORP	FINANCIAL AND INSURANCE ACTIVITIES	2.08%	Singapore
GOODMAN GROUP	REAL ESTATE ACTIVITIES	2.02%	Australia

WOODSIDE ENERGY GROUP LTD	MINING AND QUARRYING	1.87%	Australia
RIO TINTO LTD	MINING AND QUARRYING	1.79%	Australia

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

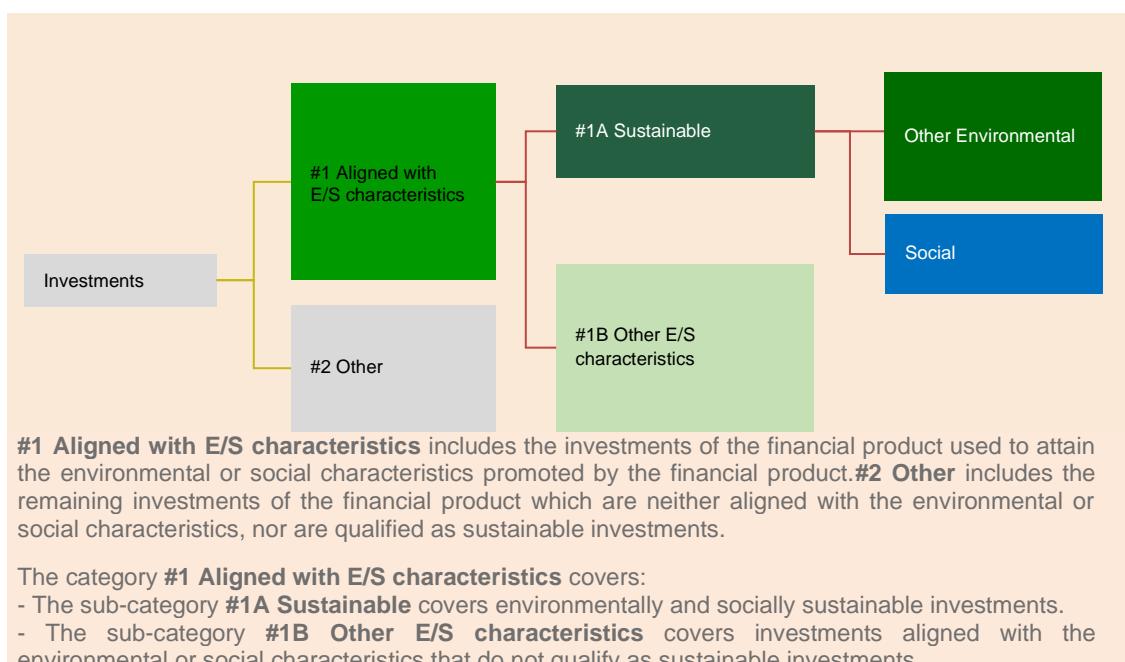

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 99.70%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.30% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2024 had a share of sustainable investments equal to 72.81%, compared to the minimum threshold of 20% (box #1A Sustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	39.97%
MINING AND QUARRYING	B	14.33%
MANUFACTURING	C	13.51%
INFORMATION AND COMMUNICATION	J	7.35%
REAL ESTATE ACTIVITIES	L	6.76%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	6.49%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	3.45%
Transporting and storage	H	3.09%
CONSTRUCTION	F	2.35%
ARTS, ENTERTAINMENT AND RECREATION	R	1.08%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.58%
PROFESSIONAL, SCIENTIFIC AND	M	0.23%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ⁷

Yes

In fossil gas

In nuclear energy

No

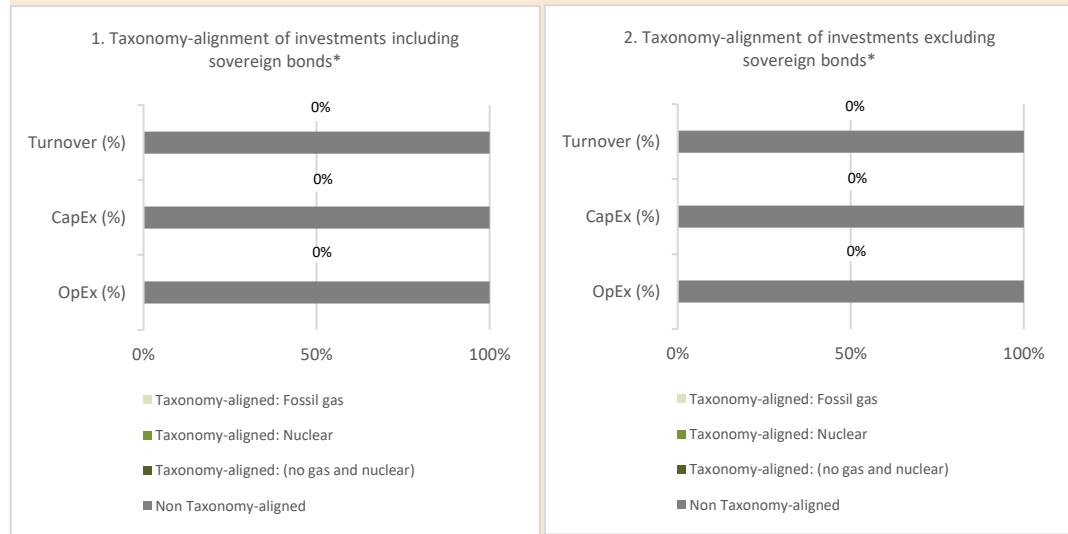

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0%.

⁷ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/24, invested 44.08% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/24, invested 72.73% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Interfund Euro Bond Long Term

Legal entity identifier 549300PC02XV84PEXD06

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy).

- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

The ESG score of the portfolio was A.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 100% as of 31/08/2024, in comparison to 100% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

Product name: Interfund Euro Bond Medium Term

Legal entity identifier 5493003PRVIYA3U2NT61

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy).
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

The ESG score of the portfolio was A.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 100% as of 31/08/2024, in comparison to 98.89% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 100%, compared to the minimum

describes the share of investments in specific assets.

threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	97.06%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ⁹

Yes

In fossil gas

In nuclear energy

No

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

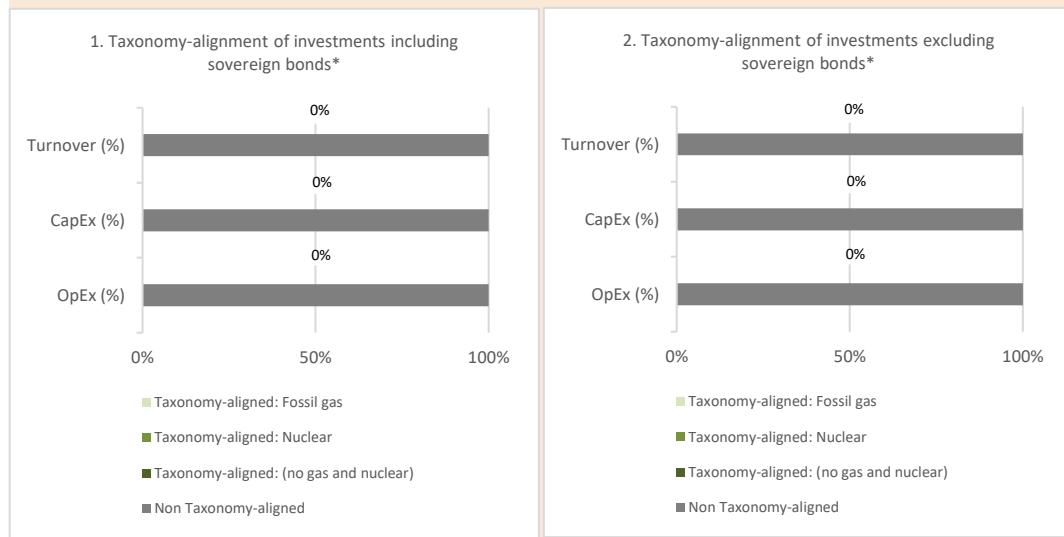

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 1.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Interfund Euro Bond Short Term 1-3

Legal entity identifier 549300CBL8CJJUIVFH73

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy).

- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

The ESG score of the portfolio was A.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 100% as of 31/08/2024, in comparison to 100% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that **do not** take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Interfund Euro Corporate Bond

Legal entity identifier 5493001X7FU83NOV2U39

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.88% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the
environmental or social
characteristics promoted
by the financial product
are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 95.11% as of 31/08/2024, in comparison to 95.52% on the 31/08/2023. In accordance with the investment policy, the sub-fund also made investments promoting sustainability objectives. As of 31/08/2024, the proportion of investments of promoting sustainability objectives was 68.88%, compared to 50.98% as of the 31/08/2023. As of 31/08/2024, the proportion of investments of promoting an environmentally sustainable investment objective was 48.87% compared to 37.77% as of the 31/08/2023. As of the 31/08/2024, the proportion of investments of promoting a socially sustainable investment objective was 65.22% compared to 45.46% as of 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into

account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm ("DNSH") threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company's website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the "Sustainable And Responsible Investment Policy" as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
KERFP 3 5/8 09/05/31	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	0.40%	France

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

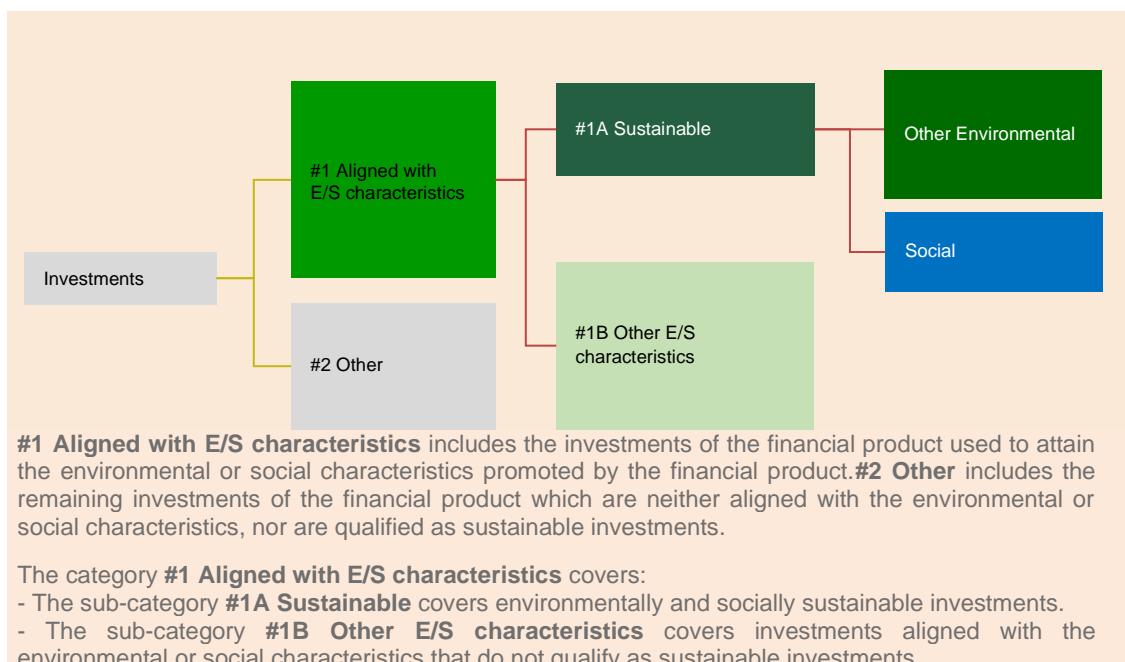

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 95.11%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (4.89% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2024 had a share of sustainable investments equal to 68.88%, compared to the minimum threshold of 20% (box #1A Sustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	51.41%
MANUFACTURING	C	12.87%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	6.27%
INFORMATION AND COMMUNICATION	J	5.07%

CONSTRUCTION	F	0.79%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	0.60%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION	E	0.51%

ACTIVITIES		
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.34%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.24%
MINING AND QUARRYING	B	0.08%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹²**

Yes

In fossil gas

In nuclear energy

No

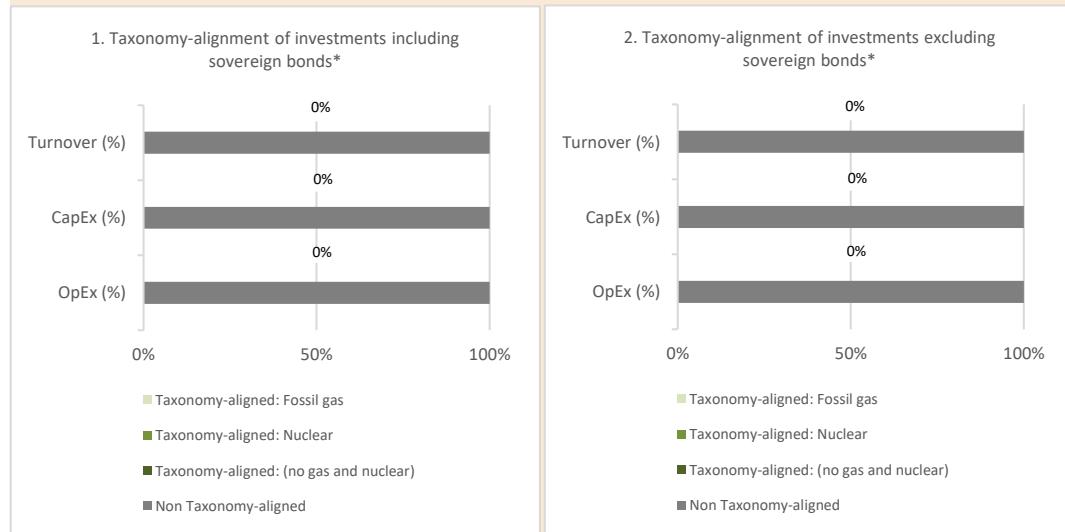

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

¹² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/24, invested 48.87% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/24, invested 65.22% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g.,

loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund Euro Currency

Legal entity identifier 549300I32E5E27J6BX11

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy).

- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. The Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion is extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 99.06% as of 31/08/2024, in comparison to 99.02% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation

describes the share of investments in specific assets.

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 99.06%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (0.94% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	41.88%
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	35.64%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	3.33%
MANUFACTURING	C	2.23%
Transporting and storage	H	1.14%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.84%
INFORMATION AND COMMUNICATION	J	0.45%
CONSTRUCTION	F	0.36%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.30%
REAL ESTATE ACTIVITIES	L	0.29%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.11%

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities
are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹³***

Yes

In fossil gas

In nuclear energy

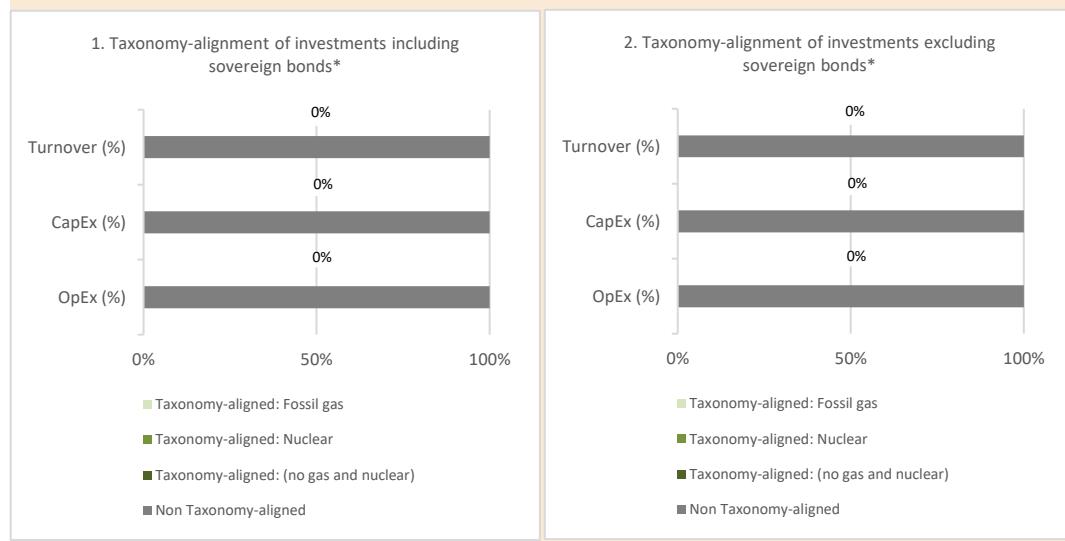

No

¹³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 64.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that **do not** take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that average ESG portfolio scoring is above the score determined as a weighted average of the scores for the AUM of each asset class that make up the financial product.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

How did this financial product perform compared to the reference benchmark?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund Euro Inflation Linked

Legal entity identifier 549300VRX8975SYUOV28

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy).
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

The ESG score of the portfolio was A.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 100% as of 31/08/2024, in comparison to 100% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Largest Investments	Sector	% Assets	Country
FRTR 1.85 07/25/27	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	5.63%	France

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 1.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹⁵***

Yes

In fossil gas

In nuclear energy

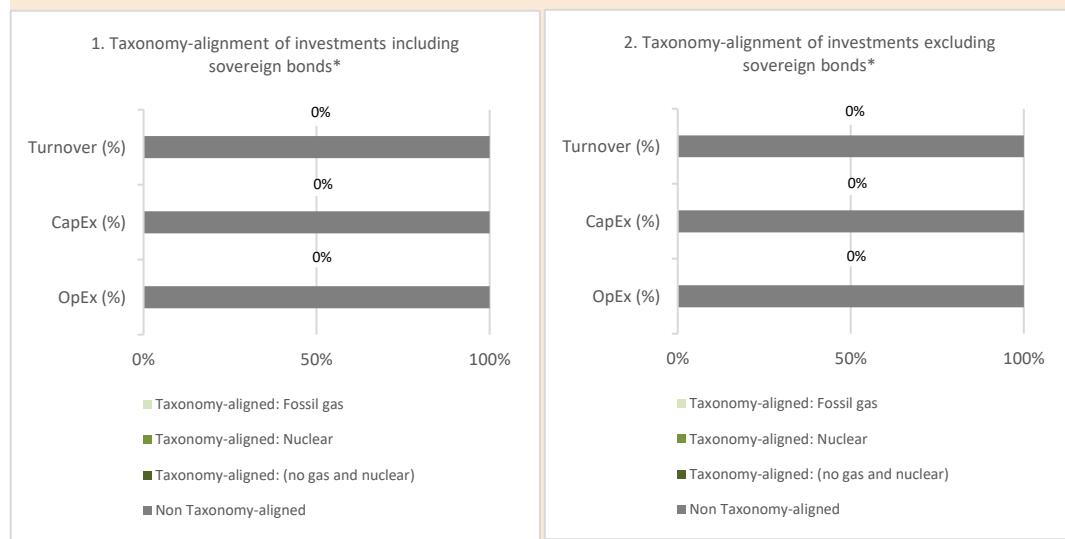

No

¹⁵ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 99.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund Global Convertibles

Legal entity identifier 5493009W50MTIJPSUX44

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the ESG rating of the portfolio.

To undertake the ESG rating analysis, sustainable characteristics of the underlying investments were defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers. The ESG score of the portfolio was A.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 95.79% as of 31/08/2024, in comparison to 55.54% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager specifically considers the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bond and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Investment Manager can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Largest Investments	Sector	% Assets	Country
BABA 0 1/2 06/01/31	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	2.95%	Cayman Islands

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation

describes the share of investments in specific assets.

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 95.79%, compared to the minimum threshold of 50% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (4.21% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	26.82%
INFORMATION AND COMMUNICATION	J	15.45%
FINANCIAL AND INSURANCE ACTIVITIES	K	12.09%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	7.67%

Transporting and storage	H	5.63%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	3.47%
REAL ESTATE ACTIVITIES	L	2.13%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	1.88%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	1.36%
ARTS, ENTERTAINMENT AND RECREATION	R	1.32%
MINING AND QUARRYING	B	1.27%
CONSTRUCTION	F	0.74%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.36%

Enabling activities directly enable other activities to make a substantial

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy

contribution to an environmental objective.
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

represented 0,0% of the portfolio.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹⁶**

Yes

In fossil gas

In nuclear energy

No

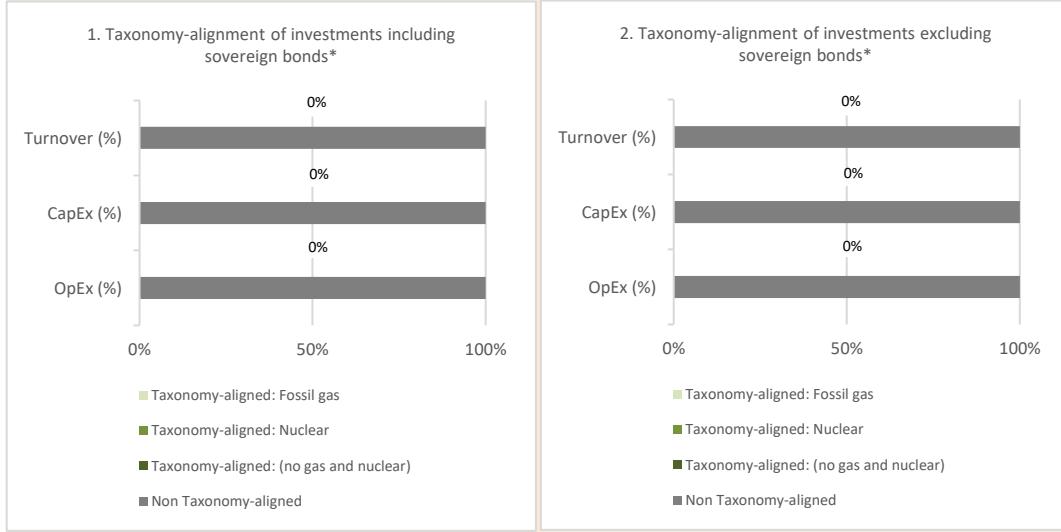

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

¹⁶ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics

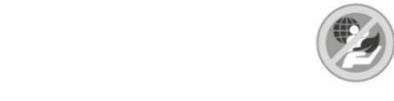

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Investment Manager are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction(WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of the most virtuous issuers in terms of sustainable performance through an ESG rating. To undertake the ESG rating analysis, sustainable characteristics of the underlying investments are defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Interfund International Securities New Economy

Legal entity identifier 5493005EGYICW68TOL20

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.06% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the
environmental or social
characteristics promoted
by the financial product
are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 99.69% as of 31/08/2024, in comparison to 100% on the 31/08/2023. In accordance with the investment policy, the sub-fund also made investments promoting sustainability objectives. As of 31/08/2024, the proportion of investments of promoting sustainability objectives was 72.06%, compared to 56.82% as of the 31/08/2023. As of 31/08/2024, the proportion of investments of promoting an environmentally sustainable investment objective was 57.14% compared to 41.70% as of the 31/08/2023. As of the 31/08/2024, the proportion of investments of promoting a socially sustainable investment objective was 71.44% compared to 54.53% as of 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into

account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm ("DNSH") threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ *How were the indicators for adverse impacts on sustainability factors taken into account?*

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company's website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the "Sustainable And Responsible Investment Policy" as well as other PAI information.

→ *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Management Company's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to

violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

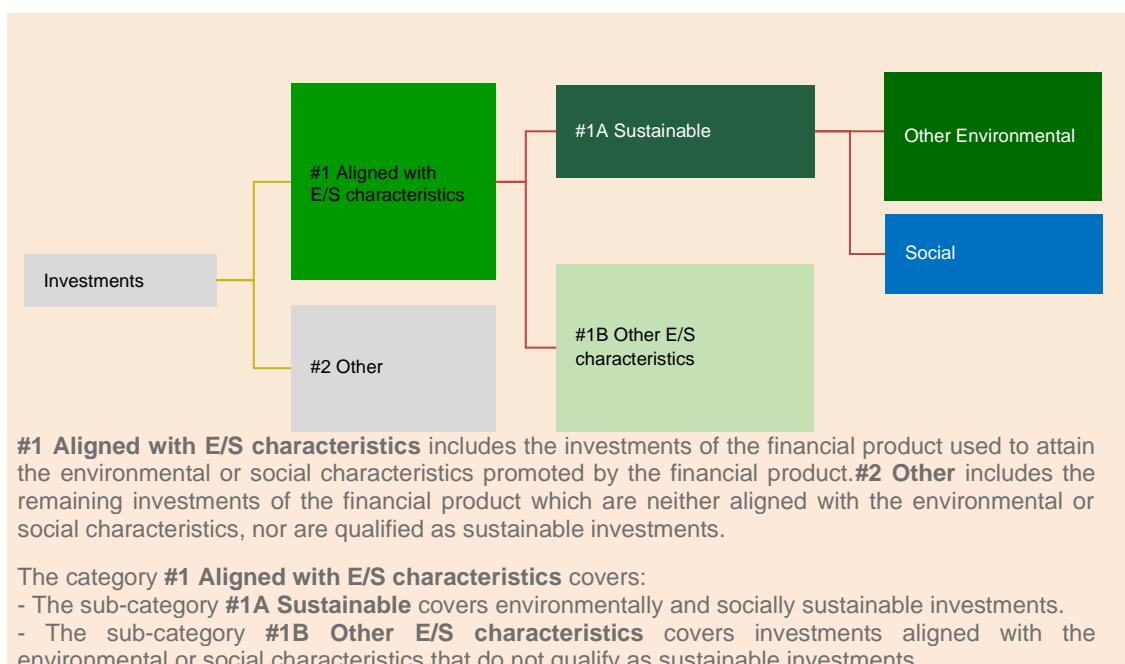

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 99.69%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.31% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2024 had a share of sustainable investments equal to 72.06%, compared to the minimum threshold of 30% (box #1A Sustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	49.03%
INFORMATION AND COMMUNICATION	J	48.52%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	2.02%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹⁷

¹⁷ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

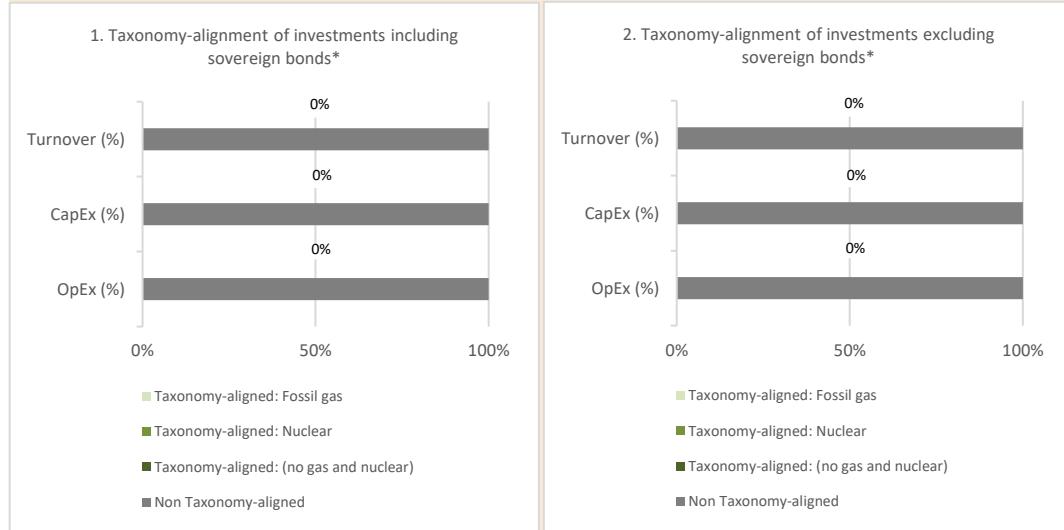

- **capital expenditure**

(Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational**

expenditure (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

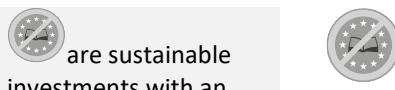

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/24, invested 57.14% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/24, invested 71.44% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund Millennials Equity USA

Legal entity identifier 549300CMG76HLAECDT30

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.46% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);

- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund had a commitment to invest a minimum of 30% of the Sub-fund's net assets in sustainable investments pursuant to article 2(17) SFDR.

The Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means

companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the
environmental or social
characteristics promoted
by the financial product
are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	MANUFACTURING	5.05%	United States of America

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

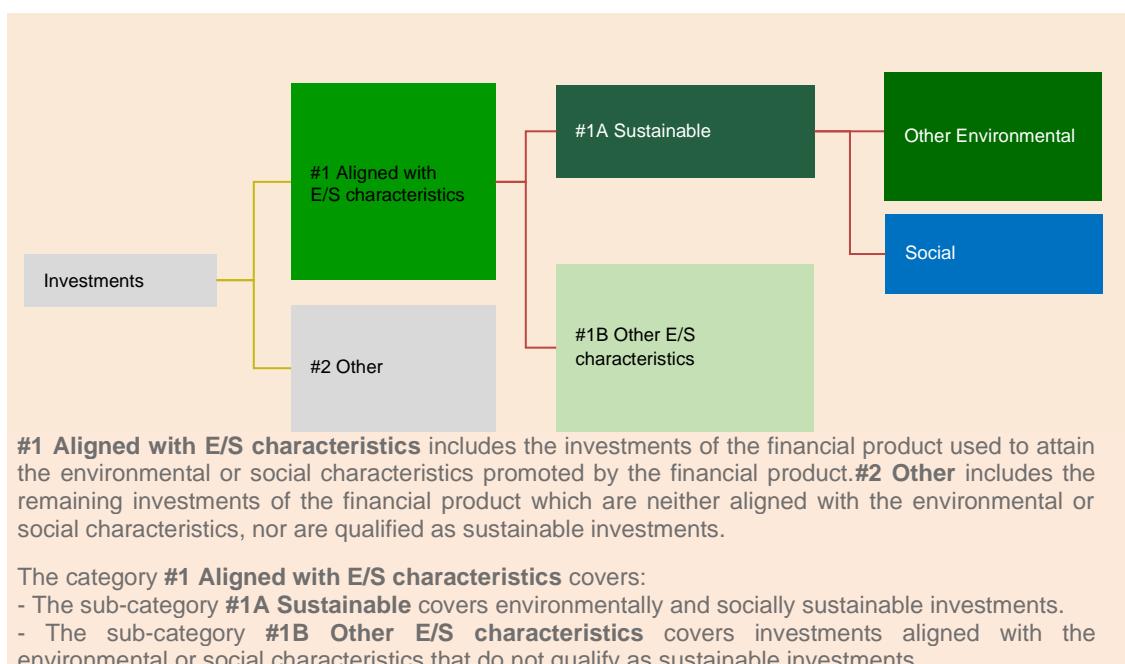

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 99.46%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.54% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2024 had a share of sustainable investments equal to 66.46%, compared to the minimum threshold of 30% (box #1A Sustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	39.68%
INFORMATION AND COMMUNICATION	J	31.40%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	10.14%
FINANCIAL AND INSURANCE ACTIVITIES	K	9.20%

Transporting and storage	H	1.66%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	1.51%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	1.34%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.83%
CONSTRUCTION	F	0.64%

Other services activities	S	0.51%
MINING AND QUARRYING	B	0.39%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	0.23%
ARTS, ENTERTAINMENT AND RECREATION	R	0.21%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.14%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹⁸**

Yes

In fossil gas

In nuclear energy

No

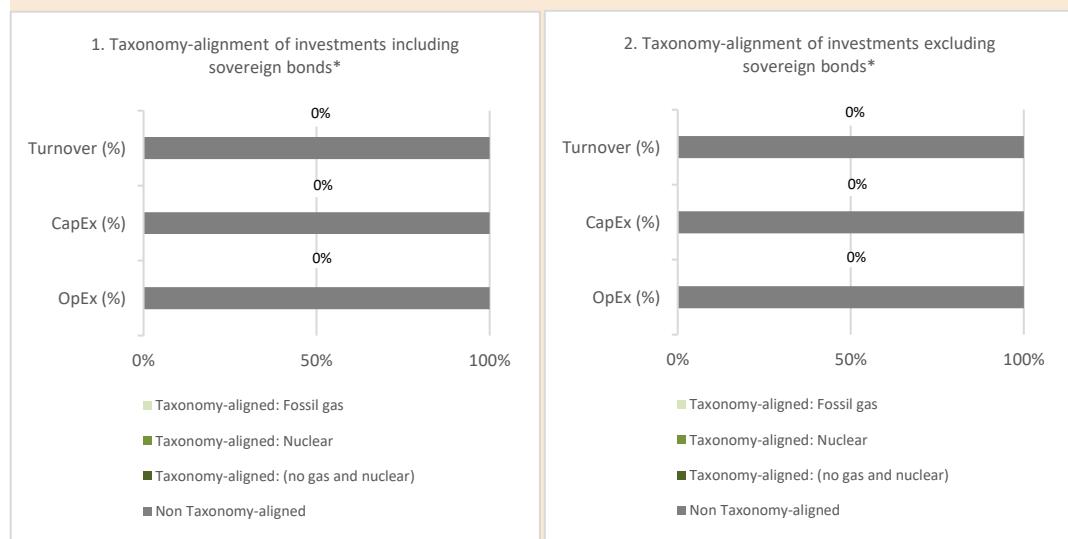

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹⁸ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/24, invested 48.17% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/24, invested 65.86% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.
- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the

external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark. To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund Multi Thematic

Legal entity identifier 549300ZNLQ28OVAKT567

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy).

- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 99.42% as of 31/08/2024, in comparison to 99.11% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 99.42%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (0.58% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	29.12%
INFORMATION AND COMMUNICATION	J	15.55%
FINANCIAL AND INSURANCE ACTIVITIES	K	13.60%
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	9.33%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	4.28%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	3.62%
Transporting and storage	H	2.58%
REAL ESTATE ACTIVITIES	L	1.85%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	1.73%
CONSTRUCTION	F	1.25%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	1.19%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy

Enabling activities directly enable other activities to make a substantial contribution to an environmental

objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (Opex) reflecting green operational activities of investee companies.

*related activities complying with the EU Taxonomy?*¹⁹

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 91.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- *What was the share of investments made in transitional and enabling activities?*

The share of investments in transitional and enabling activities was 0%

- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that **do not** take into account the

¹⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund System Evolution

Legal entity identifier 549300ERQBLM851FW232

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);

- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

Largest Investments	Sector	% Assets	Country

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Interfund Team Equity Europe

Legal entity identifier 5493004K6WC4YLVX6103

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the ESG rating of the portfolio.

To undertake the ESG rating analysis, sustainable characteristics of the underlying investments were defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers.

The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 100% as of 31/08/2024, in comparison to 100% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager specifically considers the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bond and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Investment Manager can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Investment Manager are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of the most virtuous issuers in terms of sustainable performance through an ESG rating. To undertake the ESG rating analysis, sustainable characteristics of the underlying investments are defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund Team Equity USA

Legal entity identifier 5493003W1W4EZ82FH007

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the ESG rating of the portfolio.

To undertake the ESG rating analysis, sustainable characteristics of the underlying investments were defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers.

The ESG score of the portfolio was A.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 99.78% as of 31/08/2024, in comparison to 99.49% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager specifically considers the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bond and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Investment Manager can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
APPLE INC	MANUFACTURING	7.14%	United States of America
MICROSOFT CORP	INFORMATION AND COMMUNICATION	6.30%	United States of America
NVIDIA CORP	MANUFACTURING	6.00%	United States of America

TEXAS INSTRUMENTS INC	MANUFACTURING	0.95%	United States of America

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

31/08/2024 - 31/08/2024

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation

describes the share of investments in specific assets.

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2024 was 99.78%, compared to the minimum threshold of 50% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.22% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	38.52%
INFORMATION AND COMMUNICATION	J	22.74%
FINANCIAL AND INSURANCE ACTIVITIES	K	13.88%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	8.95%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	1.98%
Transporting and storage	H	1.89%
REAL ESTATE ACTIVITIES	L	1.78%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	1.70%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	1.40%
MINING AND QUARRYING	B	1.22%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	1.18%
CONSTRUCTION	F	1.08%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.86%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.72%
Other services activities	S	0.29%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ²²**

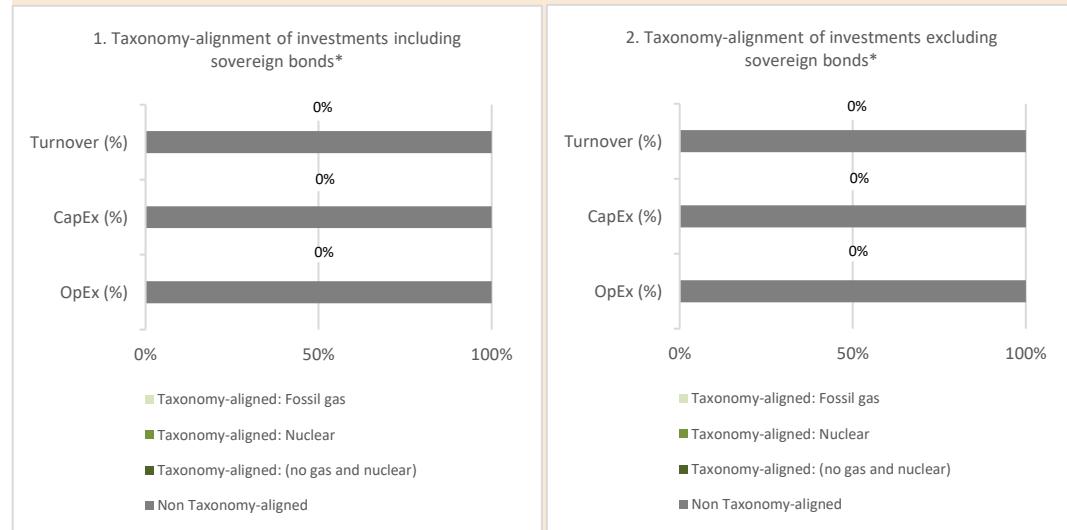

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

²² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Investment Manager are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction(WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain conventional Weapons (CCW);
 - in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of the most virtuous issuers in terms of sustainable performance through an ESG rating. To undertake the ESG rating analysis, sustainable characteristics of the underlying investments are defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Interfund Us Inflation Linked

Legal entity identifier 549300MLES A54FWV3V95

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

● ● No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy).

- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

The ESG score of the portfolio was A.

● **...and compared to previous periods?**

The proportion of investments that promoted environmental or social characteristics was 100% as of 31/08/2024, in comparison to 100% on the 31/08/2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2024 - 31/08/2024

This graph represents 1.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, the financial product does not have a commitment to invest in activities that qualify as environmentally sustainable under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

</div

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
